## Police look for red truck may have struck cyclist

Halton police want help finding the driver of a late model, large red truck that may have struck a female bicyclist in Georgetown at 11 p.m. on Friday before leaving the scene.

The woman was transferred to hospital in Toronto where she's expected to make a full recovery from serious head, leg and hip injuries.

Police said a truck, possibly a newer Ford F-150 with an extended cab, was seen driving erratically in the area before the accident at Guelph street and Normandy Boulevard, and while police are not saying this is the truck involved in the hit-and-run, they want to speak to the driver.

Police also want the public to report any vehicles with fresh damage to the front bumper or grill area to Detective Constable Solecki at 905-878-5511, extension 5108, or by calling Crime Stoppers at 1-800-222-8477.

### Police/Fire Report

#### Tire trouble

An unknown person cut off the valve stems on two tires of a minivan parked in the driveway of the owner's George Street residence overnight May 13/14, causing the tires to deflate.

Police said the repair bill is approximately \$80.

#### False alarm

A homeowner cooking a Victoria Day holiday dinner accidentally set off a smoke alarm at 4:30 on Monday afternoon, sending Acton firefighters racing to the property south of Highway 7.

#### Gas leak

The custodian at Robert Little school reported a gas leak in the school's basement, but Acton firefighters were unable to find the

source of the leak when called to the school at 10:43 on Friday morning.

Firefighters checked the school with gas detection equipment and then called union gas.

#### CO false alarms

A Tanner's Drive homeowner was advised to have his carbon monoxide detector replaced after it sounded, without apparent reason at 5:23 p.m., last Tuesday.

\*\*\*

Three minutes later, Acton firefighters were called to 349 Peel Street for a carbon monoxide alarm and again, a sweep of the residence with

## It's official – Murr tournament raises over \$52,000 on May 8

It's official.

Tournament chairman Allan Hall said this week that the Paul Murr Memorial golf tourney at Blue Springs Golf Club was the best ever.

"With excellent support from gold and silver sponsors, 255 golf participants and numerous prize donors, we raised over \$52,000," Hall noted, "which will be donated to the Acton branch of the Canadian Cancer Society."

This year's money brings the 22 year total to almost \$600,000, Hall said, thanking the sponsors, players, prize donors, volunteers and committee members for their assistance in continuing to make the tournament the success it is.

Next year's date is set for Monday, May 14 at Blue Springs.

detection devices found no trace of the deadly gas.

The homeowner said she was going to buy a new carbon monoxide alarm and was advised to install it further away from a washroom than her first device.

#### CO alarm

On May 17, Acton firefighters answered a carbon monoxide call on Storey Drive, but again found no trace of the gas. The homeowner was advised to air out the alarm and if problems persisted, to replace it.

## The Regional Municipality of Halton

### Notice of Pesticide Use

The Halton Region Health Department monitors standing water and catch basins in urban areas on public lands in Burlington, Halton Hills, Milton, and Oakville for mosquito larvae. When mosquito larvae are found, the Health Department uses larvicide to control mosquito larvae in order to reduce the incidence of West Nile virus in Halton. Larvicide will be applied by a licensed applicator contracted by the Region.

In Standing Water

Throughout the summer, the Halton Region Health Department will apply larvicide to standing water sites under the direction of the Medical Officer of Health, Dr. Bob Nosal. A granular formulation of the larvicide Bti (*Bacillus thuringiensis israelensis*), Aquabac™ 200G, registration number 26863, will be placed in affected standing water on public lands in urban areas in Burlington, Halton Hills, Milton, and Oakville. Signs will be posted at each location indicating when the larvicide was applied.

In Catch Basins

Throughout the summer through October 31, 2006, the Halton Region Health Department will apply larvicide to catch basins under the direction of the Medical Officer of Health, Dr. Bob Nosal. A pellet and/or briquet formulation of the larvicide methoprene (Altocid®), registration number 21809 for pellet formulation, 27694 for briquet formulation, will be placed in catch basins in urban areas on public lands in Burlington, Halton Hills, Milton, and Oakville.

For the locations and dates of treatment, please visit our website at [www.halton.ca/wmv](http://www.halton.ca/wmv). For more information about West Nile virus, please call Halton Region.
