Use Ceiling Fans All Year Long

Ceiling fans can prove invaluable at circulating the indoor air during the warm weather. Whether they're used alone or in conjunction with air conditioners, ceiling fans keep homeowners comfortable.

But ceiling fan use should not end once the calendar marks the change of seasons. Fans can improve year-round comfort and energy efficiency, moving warm air around the home. They're not just a pretty design accent. Most fans feature a switch that allows you to change the spin direction of the blades. During the summer you want the blades to spin counter-clockwise. In the winter, adjust the spin to clockwise to better circulate the warmer air.

A ceiling fan can be effective, but only if you choose a fan that is the right size for a room. Otherwise you will be spending money and expending energy needlessly. Today's fans feature quiet operation, energy efficiency and many blade sizes. Fifty-two-inch fans are good for rooms approximately 15 feet by 15 feet or 12 feet by 12 feet. The air in larger rooms can be circulated by a 52-inch fan however, 56- and 60-inch fans are better suited in a room of that size. Choose a 34- to 42-inch ceiling fan for smaller rooms, such as bedrooms.

Other considerations in ceiling fans are style and ease of use. Don't compromise function for style, meaning look for solid blades that are pitched correctly to maximize circulation of air. Some fans come with remote control operation so that they can be turned on or off easily even when the fan is hanging from a high ceiling or other place that is difficult to reach. Dimmer switches and other accessories can help you customize fan usage even more.
