Halton Health Dept. to administer HPV vaccine

The Ontario government's program to offer free vaccine to young women in grade eight to help protect against Human papillomavirus (HPV), will be administered by the Halton Region Health Department to grade eight girls on a voluntary basis beginning this fall in school-based clinics. HPV is a sexually transmitted virus that can lead to cervical or genital warts.

The vaccine, called Gardasil®, consists of three doses over the course of one year which will be given during the months of September to October, November to December and April to May.

"The publicly-funded HPV immunization program is an important tool to help prevent cervical cancer," said Dr. Bob Nosal, Halton Region's Medical Officer of Health. "Every

year in Ontario, about 500 women are diagnosed with cervical cancer and 140 die from the disease."

Gardasil® provides protection against four types of HPV, two of which are responsible for about 70 per cent of cervical cancers. Although the fall immunization program is available to grade eight girls only, women aged nine to 26 years can receive the vaccine from their family doctor by prescription.

For more information about HPV or the immunization program, please call Halton Region at 905-825-6000, toll free 1-866-4HALTON (1-866-442-5866), TTY 905-827-9833, or visit our website at www.halton.ca.

NOTICE OF COMMENCEMENT AND PUBLIC INFORMATION CENTRE

SOUTH HALTON WATER AND WASTEWATER MASTER PLAN UPDATE MUNICIPAL CLASS ENVIRONMENTAL ASSESSMENT STUDY

The Study

Halton Region has initiated an update to its Water and Wastewater Master Plan to identify a preferred servicing strategy to accommodate growth to the year 2021. In 2002, a comprehensive master servicing strategy (Halton Water and Wastewater Master Plan Review, 2002) was prepared to address the Region's water and wastewater servicing needs within the 2016 planning horizon. This update will review the recommendations from the previous study in the context of the current regulatory environment and planning estimates; provide alternatives to revise and update the plan; and identify a preliminary preferred servicing strategy for consideration and comment. The South Halton study area (refer to map) includes the urban areas of Burlington, Oakville and Milton as well as the Halton Hills 401 Corridor.

The Process

The study is being conducted in accordance with the requirements for master plans under Section 4, Approach #2 of the Municipal Class Environmental Assessment (EA) (Municipal Engineers Association, 2000), which is an approved process under the Ontario Environmental Assessment Act. The Class EA process includes public and review agency consultation, an evaluation of alternatives, an assessment of the potential environmental effects of the proposed improvements, and identification of reasonable measures to mitigate any adverse impacts that may result.

The intent of the master plan is to fulfill all of the Class Environmental Assessment requirements for Schedule B projects (those having a minimal environmental impact and require only a screening) as well as completing Phases 1 & 2 of the process for Schedule C projects (those with a greater degree of environmental impact). Projects identified as Schedule C undertakings will proceed to Phases 3 & 4 of the Class Environmental Assessment process following the completion of the master plan, which entails additional study and consultation.

As a part of the study, a Public Information Centre (PIC) is planned to provide background information on the study and the revisions to the previous plan being considered, including a rationale for the changes. It will also present the preliminary preferred servicing strategy (subject to public comment and agency review), associated impacts and proposed mitigation measures. Representatives from Halton Region and its consultants will be present at the PIC to answer questions and discuss the next steps in the study. The PIC is scheduled for:

Date: Wednesday September 19, 2007
Time: 5:30 pm to 9:00 pm
Location: Halton Regional Administrative Building, Auditorium
1151 Bronte Road, Oakville

You are encouraged to attend the PIC and provide your comments so that they may be included in the study. Comments received through the course of the study will be considered in finalizing the recommended servicing strategy. Comments and information regarding this project are being collected to assist the project team in meeting the requirements of the Class EA process. With the exception of personal information, all comments will become part of the public record.

Upon completion, a master plan will be prepared to document the planning process followed, including conclusions and recommendations, and how public input was received and considered. The document will be available for public review for a period of 30 calendar days. At that time, notification of the review period and master plan viewing locations will be made by means of a similar newspaper notice and a letter mailed to those on the project contact list.

Please contact either one of the following project team members if you have any questions or comments, wish to obtain more information on the project, or if you would like to be added to the mailing list:
