POULTRY AND EGGS In both eggs and market poultry the year 1934 was, on the whole, more profitable to producers than was the year 1933, says the "Agricultural Situation and Outlook" for 1935, about to be issue ed by the Dominion Department of Agriculture, in co-operation with Department of Trade and Commerce Mrs. Alfred Porter, of Corbetton visit- There is every prospect that in 1935 the ed with her mother a few days last week | farm poultry flock will again be a steady and reliable source of farm income, but prospects, both on the domestic and Miss Maude Cheyne, of Guelph, spent export markets, point more to the need of an improvement in quality than to

the desirability of an increase in volume The brightest spot in the Canadian poultry industry at the moment is the opportunity for increasing the export Mrs. J. H. Lacey has returned to her trade in market peultry. Official reports from England indicate that this opportunity in poultry products stands second

only to that of bacon. The average farm producer depends to a large extent, on profitable spring egg prices to derive a satisfactory revenue from his poultry flock____ During the spring of 1934 prices were two to three cents above those of 1933. There is no evidence that these prices were higher than the domestic demand warranted but there is 'no doubt that the higher prices paid had a bearing on the lower quantity exported, especially with the British market for-fall shipment ranging from 3 to 6 nance per long hundred less

than a year ago. As is not uncommon egg prices during the summer months were rather deed Monday from a short vacation in pressed and the most urgent need of the egg producer is to find some way to of maintain buoyant prices during the portant reason for unsatisfactory sum-Producers can do much to help normal more frequent collection and in the interval before shipment making sure

Egg prices in the autumn of 1034 were on the shoulders of some teacher who reasonably satisfactory and showed a perhaps had forty or fifty children under useful murgin of profit to producers who her charge. Mothers may be lax in had eggs to market at that time. Last discipline, but there is no reason why winter Canadian egg prices ranged as their children should not finish up the much as twenty cents a dozen above job they left at loose ends. The most United States markets of similar stand- important lessons are self-taught.

A useful development in the domestic sibility for that which you are by blaming market, more particularly in central and your mother, your teacher, some schooleastern Canada, has been in connection with Grade A-1 eggs. A considerable a bad example. Whether others help Hall, on Monday evening, was attended number of the better commercial pro- or hinder, you are the captain. ducers have taken advantage of this Geo. Laplngton and daughter, Helen, grade, and have been able to improve leave to-night for St. John, N. B., from their prices materially, numbers of producers claiming to have obtained five or six cents a dozen more for their egg than would otherwise have been the cas: movement in this line, as started

Moved by A. Mason, seconded by E. J. Nelson, and resolved that the Arena Committee for the year 1935 be composed of the following: The three memmbers of the Park and Rink Committee, G. A. Dills, Dr. A. J. Buchanan and J. M. McDonald, with Dr. Nelson as Chairman, and that such Arens Committee be authorized to engage a person to assist the caretaker in looking after the ice, in order to enable the patrons of the rink to make greater use of it.-

The Olerk was instructed to make arrangements to meet Mr. Mahoney during the week in order that the details in connection with the new building could be understood by all.

FINEST ORGAN IN THE WORLD

It is claimed for the organ which has now been rebuilt for the Albert Hall, London, that it is the finest of its class in the World. The rebuilding of the old instrument, begun eleven years ago, has been carried out on the most lavish scale. The weight of the instrument is nearly 175 tons, and it occupies 65,000 cubic feet of space. There are 176 drawstops, 10,451 speaking pipes and four keyboards. Two electric motors one of 10 h. p. and one of 5 h. p. drive the blowers which cupply wind up to 10inch pressure. Two 8 h. p. motors drive the rotary compressors which supply wind up to 30-inch pressure. Eighty miles of electric cable is used in connection with the blowing apparatus. It will cout £200 a year to keep the organ
