A number of personal letters have been received from members of the Fourth infantry, mailed beneath the frowning portals of Gibraltar. The unanimous report is pleasing and encouraging. There has been but little sickness aboard ship, and but a single death. The proposition to publish in county newspapers the names of those whose conditions are such as to require county aid, together with the amount, time and character of the assistance so given is strenuously opposed by Supervisor Hogan, who believes the plan to be unfeeling and unwarranted; an insult to the sensibilities of those who have in most cases, been brought to a state of poverty through no fault of their own. There is no material gain in such publication except to avoid imposition from the unworthy, and even then, a slight amount of imposition is much better than the bruising of human—if unfortunate—sensibilities.

The gentleman's reception to the ladies of Glencoe on Washington's birthday was delightful in every way and was highly enjoyed by the large number present, who only hope the gentlemen will repeat their effort next year. The long church parlors where the reception was held, were very tastefully decorated by a committee of gentlemen. Another committee looked after the refreshments and the young gentlemen, in very becoming white paper caps, waited upon the ladies with the dainty refreshments, a great feature of which were the little George Washington hatchets of cake, which were passed to everyone. The program was rendered by gentlemen and consisted of two delightful bass solos by Mr. Ralph Millar and readings by Mr. Williams and Mr. Barnett.
