

FOREIGNERS ATTACKED.

Bryan's Manager Bitterly Berates Foreign Born Citizens for Voting the Republican Ticket.

"These comprised fully one-half of the number of votes received by McKinley."—Deliberate assertion of democratic National Chairman James K. Jones.

"He believed devoutly that Bryan had been elected and was swindled out of the presidency."

"He believed that in 1900 the bimetallic forces would win a great victory."

His declaration that the principles of 1896 are "Absolutely essential to the welfare of the country."

The man who advocated the gold standard he denounced as "No better than a vile thief."

(From the address of United States Senator James K. Jones, chairman of the democratic national committee, before the legislature of Arkansas.)

"Hundreds of thousands of ignorant foreigners, who were here taking bread out of the mouths of honest labor, voted at the last election at the dictation of McKinley's supporters. These foreigners comprised fully one-half of the number of votes received by McKinley."

These are the words of the man who conducted the democratic campaign in 1896. The same man is the present chairman of the democratic national committee. He owes his position to the wish of Mr. Bryan.

The language quoted above was used in a speech. It is no remembered scrap of idle conversation. It was uttered in no heat of discussion. It was a deliberate expression.

"Hundreds of thousands of ignorant foreigners," said Chairman James K. Jones of the democratic national committee, "who came here taking bread out of the mouths of honest labor, voted at the last election at the dictation of McKinley's supporters. These foreigners comprised fully one-half the number of votes received by McKinley."

And then on this basis that the republican party owed success in 1896 to "ignorant foreigners." Chairman Jones proceeded to hold out the hope of success in 1900.

"Can there be any doubt," he asked, "as to which shall prevail, the six and one-half millions of intelligent Bryan voters, or the three and one-half millions of ignorant foreigners who voted for McKinley?"

It will seem to sensible people almost incredible that the chairman of the democratic national committee could make such statements in a public speech. But Hon. James K. Jones did it.

More than two months after the election of 1896 he uttered the assertions quoted.

The occasion was no less serious than an address before the legislature of Arkansas. Senator Jones had just been elected to his third term in the United States senate. On the 27th of January, 1897, the senator appeared before an informal joint session of his state legislature at the capitol in Little Rock. He returned his thanks to the people of Arkansas through their representatives, the legislature, and then he proceeded to discuss the defeat of Bryan, speaking as the chairman of the democratic national committee and the head of the management of the democratic campaign. He said that he "believed devoutly that Bryan had been elected and was swindled out of the presidency."

He declared his belief "that in 1900 the bimetallic forces would win a great victory." This small makes 16 to 1 the paramount issue.

He reasserted his conviction "that the principles he spoke for were absolutely essential to the welfare of the country." That is 16 to 1.

The senator spoke for over an hour. Running through his speech were two principal thoughts. One was this idea that republican success had been achieved through the "ignorant foreigners," a result which the senator resented in the name of the native southern population which was "more American."

The other central idea with the senator was the injustice of the unequal distribution of wealth. Upon this he dwelt with almost the emphasis which he gave to the "ignorant foreigners."

"What has been the cause of this great struggle?" the senator asked.

"The people are as honest and as industrious as they ever were. What then was the matter? The last census report shows that the wealth of the country was \$65,000,000,000, or about \$5,000 to each family of five members. The senator quoted figures to show the inequality in the distribution of wealth. Why was Massachusetts so much better off than Arkansas? Were they more industrious and more deserving? He considered that the southern people rank fully up to, if not ahead of, the people in the balance of the country. The southern people are more completely Anglo-Saxon than those of the other states and therefore more American."

At this point the chairman of the democratic national committee made one of the most remarkable of this

series of startling statements. He illustrated his assertion that there are "more American" in the country in this way:

"It took the people of the combined north and east four years to conquer the southern people and the latter had built for them a pension list that was appalling."

The senator's speech bristled with assertions intended to incite the prejudice of class prejudice. "Millionaires and millions of paupers," he said.

The man who advocated the gold standard the senator described as "No better than a vile thief."

It is difficult to believe that Bryan said at Topeka the party by its recent "practically confessed" the greenbacks simply provides for the greenbacks against gold. Bryan the republican party to a currency system which "nobody knows that the efforts of the republicans to reduce and refund down from a democratic administration. Why, is it these extraordinary because he was talking to those who will believe almost anything, and yet, speaking to such a large audience, he had to lead their minds away from the fact of an addition of millions to the currency. It is dangerous to the quantity of money increased.

Money More. It is difficult to believe that Bryan said at Topeka the party by its recent "practically confessed" the greenbacks simply provides for the greenbacks against gold. Bryan the republican party to a currency system which "nobody knows that the efforts of the republicans to reduce and refund down from a democratic administration. Why, is it these extraordinary because he was talking to those who will believe almost anything, and yet, speaking to such a large audience, he had to lead their minds away from the fact of an addition of millions to the currency. Consent of the. The south produces the cotton which is the most conspicuous factor in our world's Asiatic trade. The expansion, and the mere glance at Louisiana, as it solicited care will be taken in the uncoerced consent of the dark-

How Plants Gain Weight. As far as is known the first botanical experiment ever conducted by a Dutchman in a pot 200 pounds of dried earth, and in it he planted a willow branch which weighed five pounds. After five years' growth the willow was again weighed and was found to weigh 164 pounds. The earth in the pot was dried and weighed and had lost only two ounces.

The experimentalist upon this experiment theory that plants receive water. But he was wrong. Later it was discovered that the increase in weight of plants was derived from carbonic acid.

Vegetable cells contain a liquid known as "cell sap" holding in solution various materials which have been taken up by the roots and are in the living cells those "digestive" processes are carried on which were once believed to occur in the soil.

Long Service. John Fowler, the United States consul at Chefoo, China, has been in government service since reaching manhood—for 21 years. Beginning in 1879 as a clerk in the Washington navy yard, where he stayed two years, he was later transferred to the Tallapoosa and stayed there till she was wrecked in 1885. Ten years ago he was appointed consul at Ning-Poo by President Harrison, whence he was transferred to Chefoo by President Cleveland in 1896.

Richest Baby in the World. The little Grand Duchess Olga of Russia may be said to be the richest baby in the world. She was born \$5,000,000 was settled on her, and it is said that this sum was safely invested in British securities. For in a country like Russia no one knows what may happen to members of the reigning house.

The Same Effect. It is observed by travelers in Siberia that the effect of constant cold is practically the same as constant heat. The people develop a disinclination to work, and become strangers to ambition.

Wine in Tank Cars. In France, where wine is almost as abundant as petroleum is here, it is transported in bulk tank cars.

Want to Keep Cool. Most of the business houses in Mexico are closed for a hour and a half in the middle of the

ements for Arkansas. He illustrated his assertion that there are "more American" in the country in this way:

"It took the people of the combined north and east four years to conquer the southern people and the latter had built for them a pension list that was appalling."

PAYING DUTY IN KIND.

One Case Where a Thieving Turk Was Bitten—How Justice Is Meted Out.

The rapacity of Turkish officials of all sorts is notorious, but that of the customs officers exceeds all other kinds. An interesting instance of paying duty in kind is to be recorded. An official of the British embassy bought in Paris a dress for his wife, for which he paid £10. The customs official valued it at £60 and demanded duty on that amount. The Englishman protested, and, knowing the law, said they might keep the dress, paying him the value they had fixed upon it, less the eight per cent. This was done, and a month later at the public auction of confiscated goods he bought back the dress for £6, thus getting the dress for nothing and making a profit of £39 4s on the bargain.

Justice is meted out rapidly in Turkey. On one occasion a Kurd picked up a tobacco box in the street, which was promptly claimed by an Armenian. Just as they were coming to blows a policeman interfered. Both Armenian and Kurd claimed the box, when the former suggested that the Kurd should say what was in it. "Tobacco and cigarette paper," promptly answered the Kurd. "Nothing of the sort," cried the Armenian. "It contains only a five piastre piece." The box was gravely opened by the policeman, who then said: "The Armenian is right and the Kurd is a liar." Here he smote the Kurd's head. "Furthermore, Allah be praised!—for my trouble in deciding this complicated case I keep the five piastres."

The Shah and Chess. In his slow and costly journey across Europe, on his way to Persia, the shah tasted Gruyere cheese. He nibbled it at first, doubtfully, but took to eating it largely. Gherkins went excellently with it. Finally he substituted it for bread, and, engaged one of the most expert in his company him back to Persia.

Life Insurance Increased. Most of the old time life insurance companies have increased their business during the first half of 1900, as compared with the first half of 1899, from ten per cent. to 25 per cent., in spite of the fact that a large number of Americans were attracted to Europe this year, and the fact that this is a presidential year.

Imitation Leather from Austria. L. Schwarzhuber, of Vienna, Austria, has discovered a process for the manufacture of a leather-like substance from wood veneer for boot soles and other purposes. Starch powder or crushed potatoes are boiled under pressure in a alkaline liquid. A gelatinous brown glue is obtained, into which the wood veneer is introduced and steam pressure applied, the process rendering it soft and flexible.

Pole Defended by Ice. There are 400 miles of floating ice, plains of ice and all other sorts of arctic obstructions between the nearest discovery to the pole and the pole itself. Peary's means of overcoming these difficulties may present themselves within the next century as science progresses.

Peacemaker for the Railroads. Some years ago one of the biggest railroad corporations of this country employed a confidential peacemaker, with the idea of preventing damages. It has proved a profitable innovation and is being taken up by other railroads.

Some Bryanites pretend that the secure bulwark against free trade are tricksters. No Bryan can vote for this matter have an easy conscience Iowa State Register.

"We do not object," says Mr. Bryan, "to the honest accumulation of wealth." Neither do we interest in repudiation, flatism or treason to the flag an honest way to accumulate wealth?—Cincinnati Tribune.

Four years ago there was a man sitting on a nail keg in every grocery in Kansas declaring the price of the world's commodities ruled by the price of silver. Now the state might be scraped with a fine-toothed comb without such an argument to light Capital.

Mr. Bryan said to his fellow citizens of Lincoln: "Patience make issues." Is this a confession of the inability of the democratic party to make an issue which offers even a faint hope of success? The campaign is about to open and the democracy is poverty-stricken, not because it has failed them in every quarter, but because those it has tried to raise to naught.—Chicago Tribune.

Choice in Color of Meat. In a recent series of articles published in a German medical journal, Drs. Offer and Rosenquist deal with the opinion that has been accepted by many that white meats are more suitable for the sick, owing to greater digestibility and the presence of less uric acid and nitrogenous extractive. This belief is shaken by the analyses made by the medical men referred to, which show that while white meats, such as poultry and fish, do in certain cases, as fish and fresh venison, contain less extractive and nitrogenous derivatives, the average amount does not appreciably differ in dark and

Earnings Very Large. The well-patronized sleeping car pays for itself in considerably less than a year. Take the run from New York to Chicago, 1,000 miles. Every road in the United States pays three cents a mile for the privilege of hauling a sleeper and contracts to return said car in as good shape as it is received and to pay for all damages. The journey on the limited expresses to Chicago is made in 24 hours, therefore the car earns \$30 a day for travel. If it is full, which is generally the case, receipts from berths, sections and staterooms amount to \$185, making a total revenue of \$215 a day. Out of this must come the wages of the porter and conductor—the latter, however, usually having the charge of several cars—the towels, sheets, soap, ice, etc., the whole amounting to but a small sum. Then, there are the wear and tear and general depreciation, the daily cleaning, the annual refitting and repainting. Set these charges down at ten per cent, and give the car three trips a week of 1,000 miles each, and we have its earnings at over \$60,000 annually. Some can earn a great deal more.

Sleeping Cars Pay for Themselves in Considerably Less Than a Year.
