

Here are some facts about the viaduct as it will be when completed.

The driveway will be 40 feet clear and about 12 feet high, though that will depend somewhat on the grade. The city engineer establishes the concrete foundation on which the abutment walks rest is 9 feet wide and 3 feet deep below the present street level, so there are plenty of chances for the city engineer to lower the grade if he wishes. The abutments will be including a six foot wing at each end, 125 feet long and are built of solid stone; the lower tiers of which the stones are about 10 to 12 feet long by 8 wide, and 18 to 20 inches deep.

There will be no middle pier, and hence the big steel girders must be about 44 feet long, of the best material and of immense strength. The abutments are being built for two or three extra tracks. There are 15 to 20 men and a horse derrick with a construction train at work all the time, and so far as we could see there is no better piece of work on the line.

The Northwestern officials are entitled to great credit for the promptness which they have shown in putting in this viaduct, and in their manifest endeavor at every point to meet the people of Highland Park. The city's contribution toward the expense of the job is only a very small portion of the entire cost, \$1,000, and it is money well laid out. It will be a wonderful convenience to the public, especially the golfing fraternity.

GLENCOE.

Mr. Hubbard of Toledo, Ohio, was the guest of his daughter Mrs. W. H. Johnson this week.

Ben Sherwood left Tuesday for Pan-American Exposition at Buffalo.

Miss Coon of For Scott, Kansas is a guest of Mr Schums.

Miss Murdock returned from the east Wednesday.

Mrs. O. D. Swain entertained a number of friends Wednesday afternoon at cards.

Mrs. George Ligare and children left this week for Portage, Wis.

Mrs. H. P. Williams and son Dick returned Wednesday from North Manitowish Island.

Miss Elizabeth Stone was the guest of Miss Bessie Day this week.

Mark Orde returned Tuesday from a two weeks trip in Canada.

Mr. E. D. Brigham, Gen Freight Agt. of C. & W. R. R., has rented the Archie McLeish house, formerly occupied by Harry Totten.

Miss May Tipton is visiting relatives at South Bend, Indiana.

Mort Saunders is on the sick list this week.

The Pantry Sale given by the women's Guild, in the Church parlors last Saturday, was a success, and shows how much might be done in that line if enough edibles were provided to meet the demand.

Mrs. Scott and daughter Jessie, of Oak Park, were the guest at Mrs. J. L. Day's this week.

"Twentieth Century Lovers' Guide" is the title of a work written by a miss who doubtless lives in a section where the young men have to have houses tumble on them in order to understand.

HEAT STOPS WATCHES.

A Dealer Reports That High Temperature Brings Epidemic of Broken Mainsprings.

"This weather is hot enough to stop a clock," growled the fat man, as he got in range with the electric fan, says the Philadelphia Record. "It is, and it does," replied the jewelry store salesman, who was his vis-a-vis at lunch. "It stops watches, too."

"I haven't worn my watch for a week, so you can't prove it by me," said the fat man. "When I discard my vest I discard my watch. It's lying in my bureau drawer, and it hasn't been going for a week."

"I don't mean that," said the jewelry store clerk. "I honestly mean that excessively hot weather such as this stops watches that are kept wound up and are supposed to be in good running order. During the last three days at least 50 people have brought their watches into our store because they have stopped. In nearly every instance it was found that the mainspring was broken. The head of our watch department told me this morning that it was always so when the temperature got up around the hundred mark and stayed there for several days. Only he said he had never known so many instances of it as at the present time."

Jack Tar Is Averse to Bathtubs.

The days of the old forecastle, hung away in the dark hold under the forward mast, are gone forever, no matter what flag the vessel may carry. The forecastle on new steel ships is in a deckhouse, well forward. On American ships it is ventilated like the skipper's cabin in the stern of the ship, has a skylight and apparatus for heating. The men used to eat with their plates on their knees; now they have a mess table with racks to hold the dishes in place in rough weather. Tanks on top of the house supply running water, and the reason modern forecastles do not have bathtubs is that the sailors would rather take their baths on deck by throwing cold water over one another.

A Gentle Hint.

In our style of climate, with its sudden changes of temperature—rain, wind and sunshine often intermingled in a single day—it is no wonder that our children, friends and relatives are so frequently taken from us by neglected colds, half the deaths resulting from this cause. A bottle of Boschee's German Syrup kept about your home for immediate use will prevent serious sickness, a large doctor's bill, and perhaps death, by the use of three or four doses. For curing Consumption, Hemorrhages, Pneumonia, Severe Coughs, Croup, or any disease of the Throat or Lungs, its success is simply wonderful, as your druggist will tell you. Get a sample bottle from G. B. Cummings. Regular size, 75 cts. Get Green's Prize Almanac. Cg-25-11

AN EXPENSIVE SEWER.

Some people think our city sewers are expensive, and they are compared with an open country drain, generally pronounced "green" in the rural districts. The city of Springfield, Mass., is putting a big system of sewers and it has just let the contract for building a brick sewer, on the trunk or main line sewer, 845 feet long and the contract price is \$8,702, \$10.69 per lineal foot.

The size of sewer is about 3 feet in diameter, but the bottom of the sewer in the deepest place will be 29 feet below the surface of the ground in places two or three feet cut into the rock. The deepest cut Highland Park has, so far as we know is against the driveway, into Judge Hibbard's yard where it is 13 feet to the bottom of the sewer trench.

THE VINE VIADUCT.

We visited the Vine avenue opening under the tracks of the Northwestern Tuesday and looked over the job. The boss or foreman understands his business, the right man in the right place, we saw that in about two minutes.
