Waukegan public schools had 1463 pupils in them last week, and more to follow. They have a new superintendent, Miss Besley, one of Waukegan's own daughters, born, raised and educated in Waukegan. Highland Park has had for some years female superintendents, but they are all "imported."

The Sun says that Waukegan has received so far this season 60,450 tons of coal, and the little hamlet of Chicago is disturbed over the Bluff City's big coal trade. The time was once when Port Clinton and Waukegan had more lake trade than Chicago, and they may have again and then they may not.

T. Barbour Brown told us how they give tips to the waiters in South America. When you go to a hotel and get your table, tell your waiter how long you expect to be there. Then take a \$1 or \$2 bill—that is not what they call them down there—tear it in two parts, give one to the waiter, telling him if he waits on you well you will give him the other half when you leave, and then put it in your portmonnaie and await developments. That waiter knows, and you will get good service.

A GREAT WORK.
Superintendent Cooley of the Chicago public schools had a powerful article on the work of the school in digesting and assimilating the foreign elements in our population. Pupils enter the first grade as Poles, Bohemians, Irish, German, English, etc., many of them speaking only these languages; in the eighth grade they all speak and sing the English language; they act and think like American children and their influence on their home life, in Americanizing their parents and elder brothers and sisters, is immense.
It is a great thought, a grand fact and that editorial alone was worth the price of the paper. It also made clear the fact that superintendent Cooley is the right man in a very important place. What the eight years intellectual and social life of the public schools does for these children of foreign parentage should be supplemented by thorough instruction in moral principles so that there will be no room left in these young minds for anarchism and kindred evils. The moral is the weak side of our public school instruction and it should be rounded out into symmetry and completeness. It might be a good thing to compel some people to read and study Webster's great speech on the Girard will case.

The city officials played a hand some joke on City Marshal Roger Moore at the last meeting. Mrs. Moore was let into the secret and was at the meeting with some other friends. It was arranged that they should begin the performance by "going for" the marshal, criticising his official conduct, telling how his had riot, and all sorts of things that had and more they had not heard of till they thought he would be pretty well "riled" up and then turn the tables. The little scheme worked to a charm, and when they saw that his blood was up they turned the tables, told what an efficient officer he was, how safe anybody was up there, that town slept in peace every night, and a whole grist of compliments to the poor city marshal thought he was in the third heaven, or somewhere near there, when they presented him, on behalf of the city council and citizens, with a gold star, a badge of his high office, and Roger Moore's blood was soon at its normal temperature and when the glittering golden star was put on his swelling breast he felt as some others have before him that Highwood was a pretty good place after all. The News Letter wishes to extend its congratulations for we know a bit of the marshal's worth and courtesy.
