

Special Announcement

We find that there are a great many people in Highland Park who would prefer to use **GAS** for illuminating purposes if their houses were piped, and in an effort to have this work done we offer the following inducement:

Good Only for
the Month of **OCTOBER**

We will undertake to pipe your house (whether new or old) for the bare cost of the material put in it. We are prepared to take up hardwood floors, drop piping through partition walls and so conceal the work that it will have every appearance of having been done when the house was in process of erection. And in no case, no matter what the cost may be, will the price for this work exceed 10 cents a foot. If you wish an estimate in advance on the cost of the work done, it will be furnished to you promptly and free of charge. [For further information
