

LIGHT YOUR HOUSE WITH GAS!

Make it Bright and Cheerful during the long Winter months.
It will cost you but a trifle more than Kerosene, and is a great deal

CHEAPER THAN ELECTRICITY

We are still putting in SERVICES, but cannot do any digging after frost sets in. So, if you contemplate using GAS any time this winter, either for

Cooking or Illuminating Purposes

It is important that this part of the work (the street connections) be made immediately.

We announced in October that we would pipe houses for the

BARE COST OF THE MATERIAL PUT IN IT

Charging nothing at all for the labor. We are doing it yet and will continue to do so only as long as the weather permits of us supplying you with GAS.

Estimates in Advance Given Promptly and FREE OF CHARGE
