

Free Services

Commencing the First of April

We will give to every purchaser of a Gas Range, a

SERVICE PIPE FREE

if the measurement does not exceed 60 feet from curb line to cellar—all in excess of this amount will be charged for at regular prices.

The above proposition will hold good as well on ranges brought from Chicago here. If an owner wishes a service and will assure us it is for a tenant who expects to install a new gas range and use it, he is entitled to a Free Service. We simply wish to increase the number of gas ranges now in use in Highland Park, and will give 60 feet of pipe to do it.

The record of nearly 300 Gas Ranges in use in Highland Park should convince the most skeptical that Cooking by Gas is not only the most convenient, but the safest and most economical method yet devised.

We shall carry a full line of Gas Ranges (from \$10. up) which we will not only sell at cost, but on the popular plan of monthly payments.

For further particulars, apply to

North Shore Gas Co.
