There is an excellent opportunity for a young girl or boy right here in Highland Park to do office work. Those who have ambition to learn practical business methods should answer the ad in our want column.

We desire to suggest to the Chicago Telephone Company that the service at its exchange in this city might be improved over what it has been the past two or three weeks.—Lake Forester. If our contemporary in the town north of here has receiving some kicks from the users of the telephone service at that exchange, he ought to see our list. We have been getting them every day for some time, but we tell our correspondents that there is no use to kick, the telephone company is not alone to blame. It has come to such a pass that the employer has nothing to say about the manner of talk and insults the subscriber should get over the phone from "central," it only depends on how "hello" feels about it, and there you are. "Get another girl if you don't like it." The good Lord deliver us, when is it going to end.
