THE "CITY OF CRICKETS."

Seems to Be an Appropriate Name for San Antonio, Tex. - Insects Are Plentiful There.

"San Antonio ought to be called the city of crickets," said a man who has just returned to New Orleans from Texas, says the New Orleans Times-Democrat, "for I have never found as many crickets anywhere on earth as I found out there. It is not simply a case of the cricket on the hearth. It is a case of the cricket everywhere you go. I have been trying to figure out why it is that these insects are so plentiful in the Texas town in question. At night they swarm around the electric lights like the bugs of Daniel Cole, also was in charge of we are familiar with in other places. It is impossible to walk along the streets without stepping on them. And there is just a bit of poetry about the situation is a mistake, for another man was in San Antonio with respect to cricket life there.

> The people generally look upon them with a feeling of affection, and it is a rare thing to see a citizen show any sort of indifference to the members of this interesting family. No man would think of treading on a cricket. They take particular pains not to do anything that would in any way injure the lives or limbs of crickets. I was speaking of the poetry of the situation. It is a fine thing to hear the crickets crooning early in the evening. They chirp as cheerfully as if they were hidden away in the weeds of some romantic hedge mortalized in verse and song. Men hurry along the streets; women brush along with their musical skirts, and all the while the crickets keep on crooning their little love songs, just as if the pulses of humanity were not beating about them. It is interesting, picturesque, poetic and, if I had my way, I would christen San Antonio the 'City of Crickets.' I think the name would add color to a city already romantic in its
