FIFTY YEARS

From a small beginning this firm has grown until our factories now cover many acres. Some of our machines sold fifty years ago are still giving faithful service.

WHEELER & WILSON SEWING MACHINES

The Rotary Hook, a distinctive feature, originated with this machine, operates in one continuous revolving motion. Compared to a shuttle it works on exactly the same principle as the circular buzz saw in contradistinction to the cross cut saw. The work that can be accomplished, the speed that can be made, and the ease and convenience of operation all are features that have combined to give this machine its present enviable prestige.
