The Florsheim SHOE

High Grade Shoe Making

consists not merely in a composition of materials shaped over an attractive last.

It is a science—an art.

Scientific principles underline with absolute certainty the construction of the "FLORSHEIM" shoe. It is made over an elaborate assortment of 200 foot-form lasts, insuring a perfect fit for any foot.

The dignified appearance, the comfort and service derived from the "FLORSHEIM" shoe warrant your serious consideration.

Exclusive Agent for Highland Park and Vicinity

The Use of Disinfectants

"In the application of the better known disinfectants, such as formaline, carbolic acid, formic acid, lactic acid, acetic acid, and others for the disinfection of the internal organs of the human body, it is not unusual," says Doctor K. Spengler, "to note the appearance of harmful intensely irritating effects as secondary symptoms and following closely upon them the symptoms of cellular poisoning. When the following disinfectant is used the secondary poisoning effects are said to be avoided. This highly-to-be-desired end is attained by adding to the chief ingredient, formaldehyde, materials found in the healthy cell, where its natural function is to protect the tissue against the attack of bacteria. This material is cellcore acids, which is applied in small quantities, either in alcoholic or chloroform alcoholic solution, or paired with other organic acids, such as formic acid, for instance. Through its application a startlingly powerful disinfecting effect is produced. This remedy is peculiarly adapted to the disinfection of the pulmonary organs by inhalation."

Good Manners

Writing upon good manners, Emerson remarked, "Manners are the happy ways of doing things; each one a stroke of genius or of love, now repeated and hardened into usage, they form at last a rich varnish with which the routine of life is washed and its details adorned. If they are superficial, so are the dewdrops which give such a depth to the morning meadows. Manners are very communicable; men catch them from each other. No man can resist their influence. There are certain manners which are learned in good society, of that force that, if a person have them, he or she must be considered and is everywhere welcome, though without beauty or wealth or genius. Give a boy address and accomplishments and you give him the mastery of palaces and fortunes where he goes; he has not the trouble of earning or owning them; they solicit him to enter and possess."

NOTHIN' DOIN'.

Young Man—"Say, you—er—remember the engagement ring I bought of you yesterday?"

Jeweler—"Yes, sir. What's wrong with it?"

Young Man—"Nothing. There's something wrong with the girl. Would you mind taking it back and giving me collar buttons for it?"

DIPLOMACY.

THE senator's wife—"The life of a diplomat must be a hard one. Just look at the rings under your friend's eyes."

The senator—"Yes; those are diplomatic circles, dear."

NEEDED ENCOURAGEMENT.

"Education," said Uncle Eben, "would be a heap easier if a boy could only see his brain gittin' bigger an' stronger, the same as he kin the muscles in his arm."

Office Stationery

We are equipped to do all your work in this line. Before your old stationery is gone call up Highland Park 92 and order a new supply.

FIFTY YEARS

From a small beginning this firm has grown until our factories now cover many acres. Some of our machines sold fifty years ago are still giving faithful service.

WHEELER & WILSON SEWING MACHINES

The Rotary Hook—a distinctive feature, originated with this machine, operates in one continuous revolving motion. Compared to a shuttle it works on exactly the same principle as the circular buzz saw in contradistinction to the cross cut saw. The work that can be accomplished, the speed that can be made, and the ease and convenience of operation all are features that have combined to give this machine its present enviable prestige.
