HIGHLAND PARK

FIFTY YEARS

From a small beginning this firm
has grown until our factories now
cover many acres. Some of our
machines sold fifty years ago
are still giving faithful service.

WHEELER & WILSON SEWING MACHINES

The Rotary Hook, a distinctive
feature, originated with this ma-
chine, operates in one continuous
revolving motion. Compared to a
shuttle it works on exactly the
same principle as the circular
buzz saw in contradistinction to
the cross cut saw. The work that
can be accomplished, the speed
that can be made, and the ease
and convenience of operation all
are features that have combined
to give this machine its present
enviable prestige.
