

**GAS** FOR COOKING  
FOR HEATING  
FOR LIGHTING

The price of Gas in Highland Park is but \$1.00 per 1000 feet. It is cheaper, more convenient and cleaner than coal, and as an illuminant produces a more powerful light than any other known method, and at one-third the cost.

We also carry a full line of GAS RANGES and FIXTURES that we sell on easy monthly payments, and at absolutely cost prices.
