**Keeps Heat "Just Right"  
 Both Day and Night**

This "boss" of the heating plant looks after your comfort, stands guard over your coal bin and safeguards the family from colds due to uneven temperature in the home.

**The Jewell Controller  
 with Time Clock attachment**

Is the only device that automatically provides for a higher temperature in the morning without losing thermostatic control through the night.

For example:  
 Suppose you want to reduce the temperature of the house to 60 degrees during the night, but would like to have it at 70 degrees by the time the family arises.

Before retiring, you set back the controller to 60 degrees. Then you set the time clock attachment to bring the temperature up to 70 at seven o'clock.

In spite of any sudden changes out-doors during the night, the Controller will maintain the temperature you wish, and the faithful clock will open the drafts in time to give you the desired warmth in the morning.

And then all day the Controller goes right on keeping your house warmed "just right."

It is adapted for use with steam, hot water or hot air. Why not unload your heating worries on the "Jewell" and save money too?

Investigate this wonderful device.
