The significance of religion changes according to the need of the age and the moral progress of the world. Once the emphasis was upon philosophical forms, upon statements as to the Deity or as to human destiny; later it shifted to forms of religious organizations. In our own day it became moral and ethical, insisting that religion is valueless unless it produces virtuous lives demanding character as the proof of creed.

But now even the ethical emphasis has a changed significance; it is more than a matter of personal uprightness; it is one of social rightness.—Henry F. Cope.

"One stroke of a bell in a thick fog does not give any lasting impression of its location, but when followed by repeated strokes at regular intervals, the densest fog or the darkest night cannot long conceal its whereabouts. Likewise a single insertion of an advertisement—as compared with regular and systematic advertising,—is in its effect not unlike a sound which, heard but faintly once, is lost in space and soon forgot."
