

ES APPROPRIATIONS REACHED BILLION DOLLARS

**Tawney Disputes Charge
Points to Record of Construction Legislation.**

Washington, June 28.—Republican—Actual probable fixed charge at the revenues during the fiscal of 1911, \$893,120,761.

Democratic claim—Congress at the just closed again passed the dollar high water mark.

Both Parties Agree—Appropriations expenses of the government made in the past session aggregate \$1,33,446.

These contentions epitomize the review of national appropriations expenditures, made public by man Tawney of the appropriations committee of the house and Democratic member of that representative Livingston of Georgia committee.

Tawney's fixed-charge statement based on deducting from the aggregate the authorizations which carry no appropriations.

Tawney asserted that a sum of the constructive legislation in the first regular session of the first congress constitutes a record of accomplishments surpassing in importance any previous session in history of congress. Mr. Livingston denounced what he called a increase on account of public expenditures, an increase of the public "half billion dollars spent for war and the treasury drained army and navy."

W SHOULD CHECK GREED

Attorney General at Harvard Law School Talks on the Control of Public Utilities.

Boston, Mass., June 29.—Attorney General Wickensham, in an address before the Harvard Law School Association reviewed in brief the development of the last few years toward the control of public utilities, compared it to the growth of the machinery of trade, now comes to a control of great lines of industry by corporations or individuals.

"Never before has it been possible lay so direct a toll upon the public through the concentration of industrial power," he said. "The full significance of the attempt to check the growth and power of great combinations through the commerce clause of the constitution was scarcely perceived at the time of the enactment of the Sherman law, nor until successive interpretations of it had been given by the Supreme court.

"The history of nations indicates that at a certain period of national development becomes necessary to impose by legislation between the majority of individual greed and justice and fairness to the whole people. The right of every community to legislate respecting property affected by a public use was early recognized."

Mr. Wickensham referred to the standard Oil and tobacco cases now awaiting decision of the Supreme Court.

MAKE WAR ON GREAT HATS

Millinery Salesmen Attack Carwheel Headgear and Explain Why the Prices Are High.

Cincinnati, June 29.—An appeal for smaller and cheaper millinery was made by Vice Mayor Galvin in welcoming the Millinery Traveling Men's association at its convention.

"Can you not do this?" said the mayor.

"Yes, we can—not," responded the salesmen chorus, in whispers.

"The large hat has aggravated the congested street car problem," continued the mayor. "It is crowding the fans out of the ball parks, and need I say anything about the price?"

One thing the millinery salesmen are to talk about is the carwheel hat. They don't want it. It makes the selling of millinery by samples a cumbersome job. Millinery has gone up 50 per cent. in the last year, and a large part of the increased price, they contend, consists of the extra freight expenses big hats entail.

Springfield.—Thirty-one graduates of Concordia Theological seminary received their diplomas at the commencement exercises held in the school chapel.

Mattoon.—A two months' deadlock of the Mattoon city council was ended in a special session, when 11 saloon licenses were granted at \$1,000 each. Ten applications were turned down, the majority of the aldermen refusing licenses to all who have been indicted during the last two years for violation of the local option law. A special grand jury has returned indictments against 13 men for bootlegging, one indictment carrying 83 counts.

Streator.—John Dutke and John Sraha were drowned here by the capsizing of a boat in the river.
