MARKETING by TELEPHONE

THE retail merchant's telephone serves not only as a salesman but also as a purchasing agent.

When a merchant finds that he is going to run out of a line of goods, he calls up the wholesale or factory and not only orders a new stock, but comes to an agreement on the price and the time of delivery.

The unexpected needs of his customers can be met with the least possible delay. If the merchant cannot find what he wants in town, the Long Distance Service of the Bell System brings him into immediate communication with other cities and other markets.
