Value is what you get out of a thing while you have it. It is measured by economy of operation freedom from repairs and trouble, and constant service and length of life. Price is what you pay for a thing when you get it. You pay at once. Cost is what you pay for a thing when you are done with it. It includes original price, running expense, repairs, depreciation, trouble, loss of time and loss of service. The Price of a heating plant from us is as low as we can make it and keep the Value at the top notch and Cost at bottom notch. T. H. DECKER 126 E. Central Ave. Telephone 201 Highland Park
