Cole and sent a bullet into his own brain. He and his wife had been separated a year.

Dublin Book Pirates.

Dublin is rich in literary associations and during the eighteenth century was a busy publishing center. Some of its enterprises, however, were not of a very reputable kind. Ireland was then outside the copyright laws and English books were "pirated" in Dublin as freely as afterward in America. Some Dublin publishers are said to have kept spies in the London printing houses and by this means were able to issue "pirated" editions of important books coincidentally with and sometimes even before the appearance of the authentic issue.—London Chronicle.

Defining a Fathom.

"A fathom," explained a schoolteacher to her class in mathematics, "is a nautical word used in defining distance. It means six feet. Now, I want some little girl to give me a sentence using the word 'fathom.'" Instantly a hand shot up. "Well, Mary, you may give your sentence." "Mary stood up proudly. "The reason flies can walk on the ceiling," said the observant child, "is because they have a fathom!"

The Electric Lighted House

It was a curiosity at the beginning of the commercial adaptation of electricity. The fact now that a house happens to be not wired is about the only reason why the occupants are not enjoying the advantages of electric service as a light producer and labor reducer.

This company meets that situation with its plan of wiring houses at cost, two years to pay. The interest in reducing the cost to the least figure is mutual and the expence is low. Nor is there any difficulty about it if the house is an old one; nor any inconvenience to the people living in it. Let us tell you about it.
