**The Man Across the Street**

Thursday, the regular day of publication being a holiday the PRESS is, this week, published one day in advance. It will be delivered to the postoffice at noon today, Wednesday, and the carriers will do their best to see that all subscribers get their copies on the afternoon delivery.

Only twenty-four days to Christmas, have you completed your shopping? The Man Across the Street calls your attention to the fact that the local stores are well stocked with many beautiful and useful gifts and suggests that you inspect them before going elsewhere.

The contractors in charge of the Laurel Avenue subway having nearly completed what appears to be a good job, now is a good time to remember that while the objections of the Mayor and the City Attorney to the completion of the work under the old agreement with the Northwestern caused considerable inconvenience they saved the city about \$3,000.

**An Open Letter to our Patrons**

The meat question has become a difficult problem, hard to solve for the retailer and consumer alike.

The fact of the retailer having to pay cash every week, without fail, to the meat houses and commission men, renders it an absolute necessity either to have unlimited capital, or borrow money to meet these accounts which must be paid weekly. Hence we conclude that by placing our business on a cash basis, payable at the end of each week, we can give our patrons some benefit from the change and at the same time improve conditions for ourselves. This change from a long credit to weekly payments in cash will go into effect on December 1, 1912. This will enable us to sell the same high class goods we have always handled at a slight reduction through having bills paid weekly instead of having to frequently wait for 30 to 90 days for same, meanwhile having to pay high rate of interest on loans and overdrafts to do business in the meantime which adds to the cost of transacting business. The new plan will result in a saving to both our customers and ourselves.

**SANITARY GARBAGE DISPOSAL**

New Method Likely to be Popular where Health is Considered

Health authorities, sanitary engineers and experts, and public officials everywhere seem unanimous in the opinion that the best and only effective method of final garbage disposal is by incineration. Many cities are building plants for this purpose and in many others private concerns have built the plants and contracted with the cities for the gathering and burning of garbage. Whatever the method of collection and final disposal, however, there still remains the garbage can. This waste receptacle is opened and reopened many times daily, its contents are handled, and rehandled the collector empties it in some cases daily and in others weekly, and all the time it is a nuisance and the natural home of the germ-carrying fly. Even after it is collected the garbage is a nuisance and a menace to public health as it is carted through the streets to the dumping ground or incinerating plants. Hospitals, and many hotels and restaurants, as well as clubs and apartment buildings have installed incinerators and the garbage is burned as fast as it is collected; a clean, safe and easy method of disposal. Newspapers, generally, do not devote much of their news space to articles of trade, but calling attention to a contrivance which will mitigate a public nuisance is a public benefit, hence this departure from the rule, this article calling our readers attention to this week's advertisement of the North Shore Gas Company which contains a description of "The Incinerator," a garbage receptacle and destructor designed to be placed in the home.

**Card of Thanks**

The Ladies of Trinity Church desire to express their grateful appreciation of all the kindness and interest on the part of friends, advertisers and the public in general who contributed to the success of the Bazaar recently held for the building fund of the new Parish House. Without this generous cooperation it would have been impossible to carry it through to the successful result which has been obtained.

A wagon will call for and deliver your garments

ASK many of our citizens who have built, what is the most important contract on the house and they will tell you **THE HEATING CONTRACT**. Why? Because they made a mistake and took the cheapest. Now they know the best is the cheapest. You get the results and save the difference in fuel in a good plant. We installed about thirty plants which are among the best in town and would be glad to furnish you a list to investigate.
