**The Finishing Touch—  
Electric Light**

Exactly. No house is complete without it. Few  
are built nowadays without provision for it. Often  
houses miles away from a supplying source are  
wired in the expectation that current will be  
brought there. The reason's clear:

**Electric Light**  
is the superior light. It's in a class alone. The  
current that creates it will expel the drudgery  
from your home, too, for it can be made to perform  
all the hard work.

*Is your house wired? If not it can be easily  
and cheaply equipped. Let us tell you about it*

**THE U. S. POST OFFICE DEPARTMENT**  
Have Received Complaints Concerning the Wrapping of Parcel Post Parcels  
Complaints have reached the Department of the frequent breakage of or damage to articles sent through the mails as parcel post, due evidently to improper packing or wrapping. This condition indicates clearly that careful attention is not being given to Section 37, Parcel Post Regulations, which states plainly that "Postmasters must refuse to receive for mailing parcels not properly indorsed or packed for safe shipment."  
Postmasters and clerks are informed that whenever it is shown that the loss or damage to a parcel or its contents is clearly the result of improper packing or wrapping at the time of its receipt at the office or origin the person responsible for its acceptance in that condition will be held accountable for the damage.  
Umbrellas, canes, golf sticks, and articles of like character must not be accepted for mailing unless they are strapped securely to strips of wood of the same length and are otherwise wrapped and made sufficiently strong to withstand the impact from heavier packages coming against them in the process of handling in their various stages in transit.  
Perishable articles—particularly berries and ripe fruits—also paints, oils, etc., contact with which would be destructive to the contents of other parcels, must be denied admission to the mails unless the regulations with reference to packing as set forth in Sections 25 to 27 are observed strictly. Instances have come to the Department's notice where there has been carelessness in this regard and damage to other mail has resulted therefrom.  
You are cautioned to give this matter particular attention and to instruct your employees accordingly; also to give the subject matter appropriate publicity in your district in order that the public may be better informed as to the rules in regard to packing, and thus guard against the danger of damage to merchandise they desire to forward by mail.
