NEW YORK—Sidney Moutrop, handcuffed to a deputy United States marshal, left for Washington at two o'clock in the afternoon to stand trial on an indictment charging him with forging the name of Senator J. Hamilton Lewis, for whom he worked as secretary, to a check for \$240, drawn on the National Metropolitan Bank of Washington. He is also under indictment for stealing and sawing a ring belonging to the senator's wife. According to federal authorities here the federal grand jury at Washington is also planning to indict him on a charge of fabricating the letter in which the writer, who represented himself as Senator Lewis, offered Henry Pindell, the Peoria, Ill., editor a year's junketing trip in Russia under the guise of ambassadorship.

CHICAGO—The women are to serve as judges and clerks of election in the coming spring elections. This was a decision which County Judge John E. Owens handed to the delegation of women who besieged his chambers. Judge Owens announced that women would be assigned to the various 1,400 precincts. Under his plan judges and clerks will be alternated, so that there will be 700 women judges and 700 women clerks. The law provides that judges and clerks of elections shall be householders, but in the case of the First ward this question will be waived, because of the women in the ward reside at hotels.

NEW YORK—With one victim of bichloride of mercury poisoning apparently well on the road to recovery and another slightly improved, New York physicians are in hopes that the surgeon's knife has found a way-out of what has been considered an almost fatal condition. Mrs. Helen Janin, wife of J. A. Janin of 50 Felton avenue, West Brighton, S. I., operated on a week ago by Dr. Alfred Thomas of New Brighton, is said to be practically well.

LONDON, ENG.—Lord Cowdray is extremely worried over newspaper articles and threats of revolutionists that unless he makes contributions to their cause his oil tanks and plants will be destroyed. While his oil interests are enormous he is equally anxious regarding his men, English and Americans, who threaten to resist with their lives any attack on the property.

KANSAS CITY, MO.—One indictment charging eight men with misfeasance of the mails in a conspiracy to defraud in connection with the operations of the Florida Fruit Lands company was returned by the federal grand jury. The indictment among others is against Richard J. Bolles, a million aire of Jacksonville, Fla.

Quaint Old English Ceremony.
On the last day of each October the city solicitor of London, with an assistant, attends upon the royal remembrancer, when by proclamation the tenants and occupiers of a piece of waste ground called the moors, in the county of Salop, are commanded to "come forth and do your service upon pain and peril that shall fall thereon." The solicitor chops by halves two fagots, one with a hatchet and the other with a bill hook. Afterward comes the summons to the tenants, etc., of "a certain tenement with a forge" on the Strand and the payment of six horse shoes with sixty six shoe nails, by the solicitor. This forge has long ceased to be and the same shoes and nails are used year after year, the shoes being at least two centuries old.

Sally Savored Speech.
The natives of the coast town down east discuss every phase of life or death in terms of the sea.
A fisherman had recently laid his wife Della to rest in the village cemetery. He visited the spot a few days afterward with the undertaker, and found another newly made grave directly behind that of his wife. Regarding it curiously he said to the undertaker: "Wal, s'y, St. who's that buried 'thar astarn o' Dele?"—Youth's Companion

READS TWO WAYS.

Punctuate This Letter and Get Widely Different Meanings.

A letter, so constructed without punctuation that it can be read in a number of different ways, giving directly opposite meanings, was printed in an Indiana newspaper in 1855. The letter follows:

"He is an old experienced man. In vice and wickedness he is never found opposing the works of iniquity he takes delight in the downfall of the neighborhood he never rejoices in the prosperity of any of his fellow creatures he is always ready to assist in destroying the peace of society he takes no pleasure in serving the Lord he is uncommonly diligent in sowing discord among his friends and acquaintances he takes no pride in laboring to promote the cause of Christianity he has not been negligent in endeavoring to stigmatize all public teachers he makes no exertions to subdue his evil passions he tries hard to build up Satan's Kingdom he lends no aid to the support of the gospel among the heathen he contributes largely to the evil adversary he pays no attention to good advice he gives great heed to the devil he will never go to heaven he must go where he will receive his just recompense of reward."—Indianapolis News

A LOFTY GYMNASIUM.

Fine Exercise in the Great Dome of the National Capitol.

It would not be suspected that the great dome of the capitol could be made a gymnasium, but it is used by not a few people in Washington, and especially by some of the employees of the capitol, for purposes of exercises and the like.

Its chief apparatus in that line is the many winding steps to the top of the lantern—287 feet in the air. You go round and round and round and climb and climb. That sort of thing makes for firm muscles and is said to be the best anti-fat cure to be had anywhere, and especially in Washington. You can lose ten pounds in one trip.

The thing is done at record speed, however. It is not a slow going up and a slow going down, although with other people this seems most ample labor, but doing the thing in five minutes and less. It is a rush up and a rush down.

People who climb the stairs for sight-seeing purposes are astonished to see the Mercuries rush in the ascent or the descent, but of course they do not know what it is all done for.—New York Sun

Wanted a Haunted House.

The following curious letter was recently received by a house renting agency in London:

"Have you a reputed haunted house on your books? I am not afraid of ghosts. I do not as a matter of course believe in their existence, and I am willing to live in a house for a long or short term by arrangement, of course rent free. Should there be no ghost, then, if you wish it, I shall be willing to testify on oath to the fact. But should I see an apparition I will keep the matter secret and only acquaint you with the circumstances. I will pledge myself not to ponder to local gossip. I have a small income on which I can subsist. My sole object in this applying to you is to be allowed to live in a place in which I do not need to pay any rent."

The inquirer was informed that the firm had no haunted houses on its list, but would inform him when it had.

WHERE MONEY IS USELESS.

Ascension Island Has None and Has No Need For It.

The island of Ascension, in the Atlantic, belonging to Great Britain, is of volcanic formation, eight miles by six in size, and has a population of about 450. It was uninhabited until the confinement of Napoleon at St. Helena, when it was occupied by a small British force. It is 280 miles northwest of St. Helena. Vast numbers of turtles are found on its shores, and it serves as a depot and watering place for ships.

Ascension is governed by a captain appointed by the British admiralty. There is no private property in land, no rents, no taxes and no use for money. The docks and herds are public property, and the meat is issued as rations. So are the vegetables grown on the farms. When an island fisherman makes a catch he brings it to the guardroom, where it is issued by the sergeant major. Practically the entire population are sailors, and they work at most of the common trades. The millster is a Jack tar; so is the gardener; so are the shepherds, the stockmen, the grocers, masons, carpenters and plumbers. Even the island-trapper who gets rewards for the tails of rats is a sailor.

The climate is almost perfect, and anything can be grown.—London Family Herald

Population of Earth.

The population of the entire earth is around 1,600,000,000. Of this number, Asia has over half, 850,000,000; Africa, 127,000,000; North America, 120,000,000; South America, 45,000,000; Australasia, 5,000,000; Europe, 380,000,000; polar regions, 300,000. There are no means of estimating the increase in the earth's population, owing to the paucity of statistics and the comparatively recent date at which any sort of statistics were possible. But it is safe to say that from now on, owing to the spread of science the human increase will be greater than ever before. New York American.
