THE POOR XMAS TREES

Have you ever thought of the fearful slaughter of Christmas Trees (Norway Spruce) which is required each year in order for us to celebrate Christmas? Think of the millions of these beautiful evergreens which are chopped down to go to the many homes to die in hot parlors, Plants which have required from 6 to 12 years to grow and there is no outlook whatever for a let-up, yet it should be stopped, for it is a most barbarious thing to do. No one can be more in favor of celebrating Christmas than the writer, but to chop down, cold blooded, live trees for that purpose in this enlightened age of ours can't be right.

With this thought in mind we have for several years past encouraged the purchasing of Nursery Grown Christmas Trees potted up. These trees can be used for whatever purpose you want them for during Christmas and New Years. After that they can be planted out doors and 95 per cent of them should live. What a grand thing this is for "baby," let it have a small tree for its first Christmas and put a little copper label on the tree with the date, and the little boys and girls in school now, let them help our man when planting out the tree after the Holidays, they will come home some day grown up men and women and look at the 20 or 30 foot specimen they planted out when children. What a grand place for pleasant memories would Highland Park become in the next 20 years if the buying of live trees with pots were to replace every cut down tree bought on the street from now on. Come over and let's tell you more about this scheme of ours.

We have added a lot of beautiful flowering plants since last week. We can show you plants you have never seen before. What more beautiful could you send to your friends? Holly wreaths, the boys are more than busy winding them, bring the kids, let them see how this is done. If there is a little girl or boy who wishes to make up their own, they can do it right here.

Remember we deliver Flowers by telegraph all over the civilized world, free delivery to any point in Illinois. Don't you call that up-to-date? If you have forgotten a friend to remember with a gift, call up 85, we are awfully anxious to fill your order.
