How a Girl Went Up In the Air and How She Came Down

"Jack will not enjoy his inheritance "Not enjoy it long? Why, what do

"Jack, like other wealthy young men has been inoculated with the aviation fever. For the past year he has been thinking of nothing else. He has made a number of trips and learned all about aeroplanes and how to fly them. He has ordered one finer than any that has been produced to be made for him.' It is finished, and he is only waiting for his estate to be turned over to him to pay for it. These aviators do not live on an average more than two or three years and are liable to get killed at any time while they are flying. It's too bad about Jack. He will have a splendid fortune. He is very bright

and has a fine future before him." "Has no one any influence over him to show him that death is the inevitable end to his flights if he persists in them?"

"I am his only living near relative. I have pleaded with him to desist from aviation, to study a profession, to fit himself to live rather than to take measures for death, I have not produced any impression on him."

"Don't you think that if you could get him married his wife might accomplish that in which you have fail-

"I've thought of that, but Jack is not a ladies' man at all. He won't consent to my introducing him to girls. Indeed he won't have anything to do with them. Several women who have got the aviation craze have begged me to intercede with Jack to take them for a ride in the air. He scouts the idea 'Do you suppose,' he says to me, 'that I'm going to take up a woman to lose her head at the slightest jar in the machinery, grab me like a drowning person and land me a mass of pulp on the earth hundreds of feet below? Not much!"

"Does he take men up with him?" "Only such as he is sure will not get

She had caught the aviation fever and was much interested in this Mr. Kenworthy, who skimmed about in the air at the risk of his life, who disliked girls and who was about to step into a fortune. Could there be any combination better calculated to impress a girl in her teens? But when we consider that Miss Effingham was desirous of flying among the clouds berself we have conditions that are likely to produce results.

"Mamma," she sald after Mrs. Grosvenor's departure," "I have a curiosity to see this man who has no more sense than to risk his neck by trying to make a bird of himself and who prefers to get smashed against the eafth instead of living to enjoy his fortune."

"Good gracious, Edith, what do you

know about Mr. Kenworthy?" "I was sitting in the window seat when you and his aunt were talking about him and beard all that was said. Please ask Mrs. Grosvenor to bring him bere to dinner. But don't say anything about me, or he won't come." "I'll do no such thing. I don't wish you to have anything to do with such a man: you'll be going up with him in

"How can I do that when he won't take a girl up with him?" "Why do you wish to see him?"

"For curiosity's sake." When a girl of nineteen wishes to get her clutches on a young man, her mother is not the best person to stand in her way. Mrs. Grosvenor was invited to dinner and asked to bring her nephew with her. Since she had

He would start from a field in which stood the shed covering his machine the next afternoon at 3 o'clock. When that bour arrived a boy jumped the fence and strode toward the aeronaut.
