

Dandelions, Fertilizer and Grass Seed

If the grass of every lawn of Highland Park was allowed to grow for just one season without being cut, every Dandelion would be choked out. We never find them in the meadows when the grass is 18 inches in height. The next best way to overcome them is to create a heavy thick Turf on your lawn, the heavier the stand of grass the less room for these troublesome weeds, and this necessitates cutting a lawn, every week once, at the least, which requires feeding in order to enable the roots to furnish nourishment for the plants, otherwise your lawn will soon run out for it is contrary to Nature's plans. Every lawn of which fair results are expected should have a good dose of fertilizer and seed every spring, both ought to be worked into the surface with sharp iron rakes, after which all should be rolled, only by so doing, will you have a good stand of grass all through the summer.

Stable manure is better than nothing, but that is about all the good you can say about it, for it only contains 2% of plantfood, it isn't very pleasant to look at, laying about the place, and costs money to remove later on, not to say anything about the weed seed you bring on the grounds with it. You can accomplish more by far with commercial fertilizer, it's free from weeds, contains 20 times as much actual plant food of more permanent results, and is less expensive. Use it and with it Bahr's grass seed, there is no better, it will grow a thick green turf on a concrete sidewalk if you keep it moist. There are golf clubs who won't use no other at any price. We ship it east and west, and the present is the time to use it. Let's quote you a figure on your requirements,—you pay for everything you get here, but no one tries harder than we to give you the most for your money, that's the reason we have been doing so well in our present Pasture for the past 20 years, we are selling more fertilizer and seed than ever and Highland Park has more good looking home grounds than ever, that all goes together, we appreciate it and are keeping on giving better service. We were never more anxious to do so and if you don't like the looks of your lawn, please let us be your Doctor, let's diagnose your case. Sick lawns don't usually suffer from over-fed stomachs, it's the other way. To consult 85 means money back if we don't cure, therefore no—Pain.
