MODERN TREE CULTURE

This is the time to look after your Trees and Shrubs. Time for Pruning and Spraying.

Up to a few years ago no attention was paid to this work, any hired man with a saw and hatchet was considered good enough to chop away at a dead branch or cut down native shrubbery.

Today we realize that expert advice, trained men and careful work are absolutely necessary to preserve our native trees, have them develop into fine specimens and improve their beauty from year to year.

While a few stately Lawn Trees with well proportioned tops give character to the home grounds a lot of shaggly Oaks dotted all over the lawn detract, but in most cases such by proper treatment can be made to grow into good trees.

We are here to do this, to assist you in any way necessary, to beautify your home grounds. Let us explain to you why a certain Tree ought to come out, why another should be pruned a certain way and still another need spraying.

Let us show you where the lawn under some of the larger Trees could be made better without sacrificing the Tree, where your Shrubs ought to receive attention so as to give them a chance to make a clean growth, a shapely plant and flower more freely.

If you have Trees which you wanted taken out, we have the men, the tools and know how the quickest and cheapest way and leave the grounds in perfect shape. Like everything else, this is a business by itself and no hired man alone can do it as well nor as reasonable.

Let Central give you 85, we are on the other end and just waiting for an appointment. We will walk over your grounds with you, it will be interesting to you if nothing more and doesn't put you under any obligations,
