

### "Investor's Guide"

Under this caption some of the metropolitan daily papers have installed a department, which renders to the public free advice upon the subject of investments. In response to many of the inquiries appears the phrase:

#### "Consult your local Banker"

If in search of investments you are invited to consult us. Not only is our advice yours for the asking, but you have here the privilege of selecting from our list of Bonds and Mortgages (purchased for our own investment with our own funds) anything that fits your wants. For safe and productive investments.

#### PART OF NEW SEWER IS PUT IN USE

Wilmette Paper Says Beach is Already Clear of Debris as Result of Opening Section of new Intercepting Sewer

**Part of new Sewer in use**  
The intercepting sewer, work on which has been under way for the past three months, performed its first function Sunday night when the sewage from the village was diverted into it at the point of interception, Forest Ave. and Sheridan Rd. Conditions along the lake front are already greatly improved and no longer can scraps of paper and miscellaneous debris be seen floating in the surf. The water is perceptibly clearer and the bathers are happy. It is rumored that the park board is already planning to start work on a new municipal bathing beach and bath house and regular attendants and patrols will be placed in charge. —North Shore News.

**Wilmette After Mosquitoes**  
Wilmette is going after the mosquitoes as well as the other North Shore towns. At the solicitation of the Wilmette Improvement Association and Dr. E. E. Moore, commissioner of health, the village board has ordered a barrel of crude oil. This will be given out free to the citizens, and also applied by the village forces to the ponds and other places where there is stagnant water which affords breeding grounds for mosquitoes. —North Shore News.

**John V. Farwell's Barn Burns**  
The garage and barn at John V. Farwell's home in Lake Forest were destroyed by fire Thursday. The loss is estimated at \$8,000. All the machines and horses, including Betty Custers, a prize winning mare, were saved.

**One Drowned in Pistakee Lake**  
One man was drowned, one was badly burned on the arm and four women and one other man narrowly escaped death by the burning or drowning late Thursday afternoon in Pistakee Lake, near Fox Lake, when a "back-fire" in a 25 foot gasoline launch 200 feet from shore set the boat afire and caused the occupants to leap into the water rather than face death by fire.

**Place Premium on Arrests**  
The Hebron village board at a recent meeting appointed Elmer Torbos special automobile policeman for that village, his duties having to do with the arrest of all auto drivers guilty of violating the speed ordinance of the village. The new officer receives a salary of \$10 per month and ten per cent of all fines collected. —Grayslake Times.

#### BASE BALL

CONTINUED FROM FIRST PAGE

Glen View is, without a doubt, the strongest aggregation of all around ball players that ever donned a uniform on the prairies. They have held their own with the best semi-pro teams in and around Chicago this season and are growing stronger right along. They have a very strong following and judging from the way the tickets are being sold, every one of Glen View's fans will be on the job for Sundays game. If you are a real fan and like real baseball you should not miss this game, Sunday.

Last Sunday our boys were handed a big surprise when the Pirates of Chicago "slipped it" to the Regulars by a 6 to 1 score. Rankin of Pirates held the locals to four scattered hits, while they touched our prize, "Bobbie" for a total of eight swats. The Regulars were in a crippled condition owing to Saturday's game which was easy for them but they didn't know it, and worked hard all the time. Reed is laid up with a bad injury but played in Sunday's game. He favored his sore limb very noticeably. Ed. Conrad wrenched his knee rounding third and was replaced by Geo. Glader. "Con" still limps. He was out of the lineup Sunday and may be out for some time. "Old War Horse" Fritz Glader suffered a painful injury and still lies in a critical condition. Fritz was hit in the lower part of his back with a ball and had to be taken to a doctor. Kress relieved him in the box and finished well. Fritz allowed but two measeley hits in eight innings and was pitching wonderful ball when the accident occurred. We all hope nothing serious develops and further hope to see him in the box again soon. This was a benefit game for the Life Saving Crew and the net proceeds amounted to \$66.75.

#### Highland Hall

The guests who have come to stay an indefinite length of time includes: Adolph Weiss, Miss W. Gardner, Fred Eurich, Harry H. Fielchenfeld and family, Misses Lydia Felber and Marie Kelley, W. J. Williams and the Baron and Baroness von Reivists, all of Chicago, and Mr. and Mrs. E. C. McCoy of Kansas City, Mo. Among the week-end guests were: Sophie Guettel, Dr. C. H. Bryan, Mrs. R. N. Mathews, Miss Virginia Youngs, Mr. N. W. Mathews, Mr. and Mrs. Alfred Edler, Arthur Barnard, Mr. Fuhman and Walfrid Singer, all of Chicago.

The usual Saturday night dance was held and as the season progresses the dances seem to become more and more popular.

#### COLUMN FOR THE USE OF EVERYBODY

continued from first page  
As one who is interested in the subject brought to your readers' attention by Mr. Jens Jensen's eloquent article of last Friday, I wish to record my emphatic concurrence with the general views he expresses.

While his views on what "might have been" along the North Shore if it had been laid out with due regard to the topography of the land and its forests are right and admirable indeed, we must not dwell on dreams, but turn to reality and existing conditions and make the best of what past ignorance, arrogance and stupidity have left us.

Mr. Jensen's views on curving walks to save trees, leaving the legal aspects of the case entirely aside, need amplification. There are curves and curves. One arrangement may please the eye, the other may blot the landscape. A cement walk "wandering" apparently aimlessly and with unpleasing and monotonous regularity among trees—alongside a straight street with a walk on the other side already established and following the street in a line parallel to the latter—is an unthinkable monstrosity and the term "vandal" fits the promoter of such a scheme scheme to precision. The case is different where the walks on both sides curve, and even then the result is far from pleasing or ideal, except where both, street and walks curve. And because some streets unfortunately do not curve is no argument for making bad worse by following a path as aimlessly and unpleasing as that of a cow—or worse.

Speaking of cows, they are at last coming into their own if we may judge by a prominent example of establishing their residential abode on, nothing less than Sheridan road. Well, the cows and hens ought to appreciate (if not one else does) to be considered a necessary adjunct to landscape architecture and general effect and the vandalism and ignorance that is responsible for the removal of trees to prevent a walk from coming within three feet or so from the curb or to make room for a symmetrical street arrangement is happily balanced by that splendid public spirit, patriotism and whatever else we may wish to call it, that is responsible for putting a barnyard fronting Sheridan road at a prominent corner of this wideawake town. And if adjoining property owners are belligerent and fail to grasp the inspiration of such a barnyard and its highly artistic aspects, it is not the fault of the genius who claims creatorship. It is in conclusion I wish to state that I am in favor of saving trees that have historical value by curving the walks at such points in side, but no walk should have continuous curves along a straight street nor should any walk cut into the customary parkway.

Yours very truly  
Carl Hoermann.

#### HIGHLAND PARKERS IN EUROPE

Cablegram Received from Miss Ruth Gregory but no Messages From Others

Mr. and Mrs. Robert B. Gregory received a cablegram last Tuesday from their daughter, Miss Ruth Gregory, stating that she and her cousin, Miss Jean Sterling would sail from France if possible, on the Transatlantic Line, otherwise they would cross over into England and return by English line on the Oceanic about Aug. 12th. Miss Gregory sailed for Europe May 30th.

The following Highland Parkers from whom no word has been received which was written since war was declared, who are also in Europe are: Leslie Schaffler, abroad for a year; at present in Paris, France; Mr. and Mrs. Frederick W. Stearns are in England and expected to go within a fortnight to France; Judge and Mrs. Chas. Fishback; Bowen W. Schumacher, who sailed July 14 for two months absence abroad to visit in Paris, London and Switzerland; Mr. and Mrs. Ward W. Willis and family sailed the latter part of June expecting to return the latter part of this month; Mr. and Mrs. Geo. W. Roberts and Miss Helen Roberts traveling abroad since latter part of May. They plan to remain indefinitely.

#### PFANSTIEHL HAS NEW INVENTION

Former Resident Discovers Substitute for Platinum in Electrical Devices

Stockholders in the Pfanstiehl Electric Co. and the many friends of the young inventor who heads the company has here will be interested in the following extract from an interview with Mr. Pfanstiehl published in the North Chicago Times-Review: "This process of making the Tungsten, was recently worked out in Germany and by the General Electric Company for use in the so-called Tungsten electric light globes. I have been working for about three years on a method to further prepare Tungsten metal suitable to replace Platinum for contact points. For about a year we have been quietly making and using our own contact points from Tungsten, and find that the new contacts work very much better than Platinum as we heretofore used, and we can make them at a great saving in cost. After giving this material a year's practical test on thousands of coils we decided to put these contact points on the market and are now furnishing them to the trade in very large quantities.

"We have several patents on our system of manufacture. "We are experimenting all the time on these rare metals with a view to finding other methods of working them and new uses for them as I believe this field to be the most interesting and profitable of all commercial research work. Our business has grown so rapidly during the last few years that it becomes necessary for us to reorganize our company with a view to securing sufficient capital to operate our growing business."

#### WINNETKA ALSO AFTER SPEEDERS

May Have Auto Instead of Motorcycle for Speed Cop

Those who are condemning the local police for their activities in regulating the speed of automobiles may be interested in the following account, from the Lake Shore News of Winnetka's work along the same line:

"The Winnetka village authorities may adopt a new and novel way of catching persons who insist in violating the speed laws. Because of his activities during the last two years Police Chief Peterson and his motorcycle are now so well known to the speed fans that as soon as they see him coming they slow down so he can't get them with the goods. Also the loss of the fines which were collected is quite noticeable, so some remedy of this state of affairs was needed. It has, or is thought to have, been found.

At the meeting of the village council held last week Trustee Heller suggested the plan of the village purchasing an automobile for the use of the police department. The plan was discussed pro and con and was finally referred back to Mr. Heller for further investigation. If the plan is passed by the board, Winnetka will be the first town along the North Shore to provide this novel way of enforcing the speed laws."

We have committed the Golden Rule to memory. Now let us commit it to life.—Markham.
