**EXPECTATION OF LIFE.**

**Year One May Count Upon Living at Any Given Age.**

No statistics have been calculated with greater care than the tables which give the exact expectation of life for men and women at various ages. These mortality tables are officially accepted by the various states in the United States, and from them the life insurance companies compute their rates of insurance. They are as accurate as the most carefully gathered figures can make them.

At ten years of age the expectation of life is 48.72 years. When one has reached the age of twenty the chances are much improved, and there is still an expectation of 42.20 years before one. At the age of twenty-five the average has improved, and there are still some thirty-nine years ahead.

For the normal man or woman thirty years of age the average length of life is sixty-five years. A person thirty-five years old may count, according to these tables, on thirty-two years more.

As each milestone is passed the prospect brightens. Thus at the age of forty the prospect is for nearly twenty-nine years more, and at forty-five there is an expectation of twenty-five more years.

By the fiftieth year the expectation is about twenty-one years, and in the fifty-fifth year it is nearly eighteen more. A man of sixty may look forward with some confidence to fifteen more years of life, and this increases so that at seventy years the prospect is eight years. On having successfully passed the eightieth year there is an expectation of about five years.—Exchange.

**Of Great Pride.**

The lion had been teased and provoked by an ill conditioned keeper until his patience was quite spent. The enraged beast leaped upon the fellow, knocked him down and fetched him such a blow on the head that his skull was crushed like an eggshell.

"That means the end of you, your majesty," sniggered the jackal in the next cage.

"It would, old night prowler, if I were a mere man," replied the lion, licking a bloody paw, "but you forget that I cost \$5,000."

The surviving keepers came, soothed the costly creature with a quarter of fresh beef and hastily removed the body of their comrade from the cage.—New York Post.

**Nuts as Food.**

A judicious use of nuts has cured cases of indigestion by relieving the constipation which was the cause. Brazil and pine kernels particularly are rich in natural oil which gives warmth, keeps the digestive system clear and does much toward making the skin clear and healthy. Weight for weight nuts contain actually far more protein than bread. They are a safe food for all who have a tendency toward any form of rheumatism, and they are also beneficial in cases of mental strain and general "nerves."

**THE DRY BATTERY.**

Its Many Uses and the Numerous Processes in Its Making.

That common little object, the dry cell, has played an important part in the advancement of scientific research. There are few articles manufactured that are used in so many ways as the dry battery, yet it is by no means a recent discovery.

The automobile, motorboat, wireless telegraphic apparatus, Christmas tree festoons, electric toys and trains, electric engines, local bell, telephone and annunciator systems, miniature lighting equipments, medical batteries and vibrators, electric alarm clocks, burglar alarms, automatic door openers, safe cranking devices and infernal machines in their many forms, devices for setting off dynamite explosions in excavations, the various testing out-fits and electric clock service, to say nothing of the divers ways that it is used in scientific experiments, are a few of the most obvious of its applications.

In its manufacture there are about as many processes as are necessary in the making of a tungsten lamp, and the machinery process that makes it and compounds the ingredients that go into it is wonderfully interesting. So exact is the formula placed into each shell, that when completed a battery will register up to a uniform amperage. The highest known amperage in the manufacture of a dry cell is twenty-ox.

The exact origin of the dry battery is uncertain, many inventors having claimed the honor.—New York World.

**Wanted a Little Praise Mimsen.**

Following a disastrous fire in a western city, many men and women gathered to look at the ruins. Some of the men, seeing that a wall near which they were standing was tottering, made haste to get out of the way and narrowly escaped being crushed.

Johnny Brabson, a good Irish citizen, was so near the wall that he could not escape with the others. So, whirling about, he made for a door in the wall, burst through it and came out on the other side, safe and evidently very proud of his exploit. Women who had shut their eyes and shrieked when they saw his danger now gathered round him in great joy and cried out: "Praise heaven, Johnny Brabson, down on your knees and thank heaven!" "Yes, sis," said he, "and I will, but wasn't it injanevous in me, now?"

**WANTED, FOR RENT, FOR SALE**

**CLASSIFIED ADVERTISING RATES**  
5 lines or less, 1 insertion, 25c, each additional line 5c.  
Blind ads, where replies are ordered sent to this office, double rates.  
Advertisements will not be received for publication in the current issue after 5 p. m. Wednesday.

**Free Yourself from Needless Laundry Drudgery Install a RUUD**

How often have you commenced your laundry work bright and early and had the "job" held up and dragged through the entire day, all because your hot water supply was limited? Now suppose the opposite extreme prevailed—unlimited hot water as easily obtained as your cold water supply. Wonderful! you will say—yet an ideal condition enjoyed daily in over 100,000 American Homes. You simply connect the RUUD AUTOMATIC GAS WATER HEATER to the piping already in use and TURN THE FAUCET. That's all there is to it. The Ruud is in the basement—out of sight—out of mind. It gives you no trouble and is always ready to plentifully supply the laundry without interrupting the other demands of the household. Let us tell you how much it will cost to have this perfect hot water service in your home. The Ruud is displayed at the Gas Office or a postal will bring you complete descriptive literature.

**THEY WERE WELL MATCHED.**

Why the Ramseys Were Like-Old-Joe Murchison's Team.  
"It seems strange that the Ramseys should have married each other," said Mrs. Pilman.  
"Strange? Not at all, my dear!" replied her husband. "They are well mated—as well mated as old Joe Murchison's horses were."  
"I don't know anything about Murchison's horses," said Mrs. Pilman, "but I know that Mr. Ramsey is big and handsome and indolent, and Mrs. Ramsey is always at work and is thrifty into the bargain."  
"That bears out what I say, my dear," said her husband. "Let me explain. In that remote and 'dark age' period of my life before I knew you they offered a prize at the annual fair for the best matched pair of agricultural horses. There were some beauties brought in, so that everybody laughed when old Joe Murchison came driving along a great, handsome, slow moving horse harnessed with a wiry, scrawny little beast that took two steps to the big fellow's one."  
"That's a finely matched pair!" somebody shouted.  
"So they be!" agreed Joe complacently. "So they be! The best matched pair in the county! One's willin' to do all the work an' 'other's willin' he should!"—Exchange.

**CURIOUS CLIFF HOUSES.**

**Quier Prehistoric Dwellings in Mesa Verde National Park.**  
The Mesa Verde National park is situated in southwestern Colorado and may best be reached from Mancos. Within the park are many notable prehistoric ruins, the cliff dwellings comprising a group of great importance to the study of American archeology. The principal and most accessible ruins are the Spruce Tree House, Cliff Palace, Balcony House and Tunnel House.  
Spruce Tree House is located in a left branch of Cliff canyon, a branch of Navajo canyon. It originally contained about 130 rooms, built of dressed stone laid in adobe mortar, with the outside tiers chinked with chips of rock and broken pottery.  
Cliff Palace is located about two miles east of Spruce Tree House, in a left branch of Cliff canyon, and consists of a group of houses with ruins of 140 rooms, including twenty round kivas or ceremonial rooms and a tapering loop-holed tower forming a crescent of about 100 yards from horn to horn, which is reputed to be one of the most famous works of prehistoric man in existence.  
Balcony House, a mile east of Cliff Palace, in Italy canyon, contains about twenty-five rooms, some of which are in almost perfect condition.  
Tunnel House, about two miles south of Spruce Tree House, contains about twenty rooms and two kivas, connected by an elaborate system of underground passages, and a burial ground of 5,000 square feet. In each of these villages is an elaborate system of fortification, with in some cases walls 2 1/2 feet thick and twenty feet high, watchtowers thirty feet high and blockhouses pierced with small loopholes for arrows.  
**Conflicting.**  
"What's the matter?" a colleague asked of the advertising manager.  
"Matter enough. The fools have placed Mme. Soprano's testimonial for a cold cure on the same page with the announcement that she had a sore throat and couldn't sing."—Topsita Journal.

**THE OLD YORK ROAD.**

Built in 1711, It Was the First Great American Highway.  
Something over 200 years ago there was built the first great American highway, "the old York road," between New York and Philadelphia.  
The construction of this famous road in 1711 was an example that led the energetic colonists at other points along the Atlantic seaboard to make similar roads where there were no water routes. For the most part these roads were built by chartered companies and were called turnpikes or toll roads. Pennsylvania, Connecticut and New Jersey had many roads of this kind.  
The first macadamized road in this country was constructed in 1792 between Philadelphia and Lancaster. In 1811 there were said to be 4,500 miles of chartered turnpikes in New England and New York. During the next twenty years the government expended many millions of dollars in constructing great highways, but the panic of 1837 and the building of railroads and canals put an end to that branch of the government work.—Washington Star.

**William A. Rosing**

Candidate for  
**County Treasurer**  
Subject to the Decision of the Republican Primaries, September 9th, 1914. Your Support Respectfully Solicited.

**HIS PLATFORM**

If chosen to represent the Republican Party for the office of County Treasurer, and if elected, I will accept, as remuneration for my whole time and the best business administrative ability I possess, the salary allowed by the County Board of Supervisors as full pay. I will turn into the County Treasury, as earnings of the office, every penny received from interest on public monies, inheritance tax fees or any other source. I believe the salary allowed by the Board is ample compensation and am willing to give the work my best attention without thought of any perquisite.  
I solicit the support of everyone in the county who wants honest and efficient administration of the public business.  
WILLIAM A. ROSING.
