ACOUSTIC CLOUDS.

Why Church Bells Sound Louder on Some Days Than on Others.

Every one has noticed that on certain days church bells are heard much better than on other days. The same distance intervenes between the church and the person's residence, the same intensity is used to strike the bell, the same visible obstacles are between the two at one time as at another.

Then why does the intensity of the bell vary? It has been found that there are what is known as "acoustic clouds" in the air. They cannot be seen, but they may be detected artificially. They have the property of reflecting sound just as a brick wall has. So if a thick one of these so called "clouds" intervenes between the church bell and the observer most of the sound is reflected back to the bell, and very little gets through. The acoustic clouds consist simply of a large quantity of water vapor in the air, and water vapor itself is invisible. So we are able to see through something that we cannot hear through. Generally, of course, it is the other way round. We can hear through a piece of black paper, but we cannot see through it.

Now, if these acoustic clouds are disposed in a certain manner it is possible that they will reflect the sound into a region where the bell's tone is ordinarily not heard at all save when the clouds are present and disposed in the proper manner.—Chicago Herald.

Still Obscure Druid Festival.
The old druidic fire festival of druidical origin is still celebrated on the continent, but there is probably only one spot in Great Britain where it is still observed, and that is Tarbolton, in Ayrshire. For days before the festival the village mids collect materials for the great bonfire. The fuel is built upon an altar of turf, and a match is applied at sunset, after which the folk solemnly march around the blaze, and the daring youngsters vie with one another in dashing through the flames.—London Times.

Mules and War.
Along all the frontiers of the world wherever there is a war there is a demand for the mule. Compared with him the much vaunted war horse is a vanishing figure of the past. His strength, his sureness of foot, his wariness of eye, his ability to endure hardship and hard work on little food and with little care, have made him invaluable as a campaigner, whether in deserts or mountains. The mule has seen the camel and the elephant disappear from armies. He may see the horse vanish. He has seen the motorcycle and the motorcar come in. He may see the aeroplanes numbered by thousands. But it is not likely he will ever see himself superseded in his own line of work. There may be mules without war, but probably never a war without mules.—New York World.

The Stepping Stone to Success is **STENOGRAPHY**

It is not necessary to go away from home to a business college to learn Stenography

We teach you to become an expert stenographer by correspondence and furnish you a Remington Typewriter for practice work without extra charge. We furnish all supplies free with the course and a little study each evening will enable you to complete the course in from three to five months. Our wonderful method of teaching stenography by mail makes it possible for our students to become proficient stenographers in about half the time it takes students attending the ordinary business college and devoting their entire time. The system of shorthand we teach is used by more court reporters and stenographers than all other systems combined. It is the most rapid and the easiest system to learn that has ever been devised. We teach you every branch of the art of stenography and when you have completed our course you will be a competent stenographers. Our Graduates make all the way from \$60 to \$150 per month.

If you would like a salary like some of our girls and boys are now getting write for enrollment blanks and further information today.

Typewriters and all supplies are furnished free to our students. Low rates of tuition on easy monthly payment plan
