SANTA KNOWS WHERE TO GET WARM—YOU BETCHA!

Built to Meet Your Personal Demands

No one had believed it possible to produce a heater that would burn hard coal, soft coal and wood, perfectly, in the same stove, until the ROUND OAK FOLKS produced their masterpiece—the "Double Burner." This vital step in advance, represents years of investigation and two generations of stove builders' efforts. In using soft coal, the Double Hot Blast burns the smoke, soot and gas, producing a clear bright flame, developing all the heat from the fuel, and the large radiating body of the heater delivers it direct into your rooms, not out of the chimney.

In selecting this Specialty, we did not purchase a stove to sell at a price, but secured the exclusive agency for the "all fuel" heater that produces the maximum of results at the minimum cost of upkeep and lasts a lifetime.

Investigate! Have one delivered to your home this season.

NEW SHERIDAN RD. DEDICATED SATURDAY

Continued from First Page
will probably be completed in 1915. When this is finished it is the intention of the village authorities (so we are informed) to rebuild Sheridan Road in a first class manner.

A referendum vote was taken on the Lincoln Park-Sheridan Road proposition at a recent special election when a record vote was polled. The proposition was defeated by a majority of one vote, the result being 526 "for" and 527 "against." Many who did not vote have recently stated that if another referendum vote is taken, they will be on hand to see that the proposition is carried by a good majority.

Glencoe.—Glencoe was the first village to act on the Lincoln Park proposition. Sheridan Road is in good condition through Glencoe, and will be maintained next year by the Lincoln Park Commissioners.

Highland Park.—In the south end of Highland Park, from the County Line to Ravinia, Sheridan Road is in excellent condition, due to the special repairs for which the Association raised money in 1912. While these repairs were expected to be only of a temporary character, yet the third summer since the work was done has just passed and the road is still in better condition than most other North Shore roads. This work was done under the direction of the Commissioners of Lincoln Park. From Dean to St. Johns Ave. a new road has just been completed which is said to be the best piece of concrete road ever built. This portion of the road was formally opened for traffic on Saturday, Nov. 28th.

Fort Sheridan.—Sheridan Road through Fort Sheridan has been ordered rebuilt next year.

Lake Forest.—Definite plans not yet adopted.

Lake Forest to the Wisconsin State Line.—No work has been done by the Association on the Sheridan Road plan north of Lake Forest, because it seemed better to concentrate their efforts on the most needed portions first.

Ossoli Club

Miss Laura K. Kennedy has charge of the program for the Ossoli club this evening. Mr. Alex Gray will sing, accompanied by Mrs. Annette Jones at the piano. Miss Evelyn Isom of Kenilworth, who danced at Ravinia Park this summer, will appear in dances. Miss Kennedy has promised a great surprise for the guests.

United Evangelical Church

The annual fall rally of the Chicago K. L. C. E. Union was held in the church Tuesday, Nov. 25th. Mr. Torey of Moody Institute conducted the song service. Rev. Landwer read scripture services and Rev. Lambert gave an address. Special music was provided by the Hoyle Ave. League.

The Thanksgiving sunrise prayer meeting conducted by the K. L. C. E. of the church was largely attended and proved a very helpful and inspiring meeting.

AN OPTICAL ENIGMA.

Why Is It the Human Eye Sees Things Right Side Up?

Just why we are able to see things right side up is a mystery which science has not yet been able to explain.

We know that the human eye involves the same optical principles as a camera. Owing to the fact that light always travels in a straight line and never in a curve, the rays which emanate from any object within our range of vision have to descend and ascend in order to travel into the narrow opening in the eye which corresponds to the camera's lens.

These rays finally reach a point where they intersect. Continuing on in straight lines, their relative position becomes just the reverse of what they were when they left the object seen.

Thus the image register on the retina of your eye is topsy turvy. Just as it is on the photographic plate in a camera, if you are looking at a house, for instance, the image your eye gets will show the chimneys down below, the foundation walls up above, and so on. But the impression your brain gets reveals the house right side up unless you happen to be afflicted with a rare disorder, which results in everything always appearing topsy turvy.

During the infinitesimally short period required to flash the image seen from the eye's retina to the brain all the light rays which created the image are reassembled and put back in their proper places, so that the brain sees the object as it really is and not in the topsy turvy form it was registered on the retina. Just how this miracle is performed is what science would like to find out.—New York American.

Sacred Shells.

The clever priests of China often insert tiny images of Buddha within the shells of a living oyster, which are left undisturbed for about a year. At the expiration of that time the images are covered with mother of pearl to such an extent that they appear to have grown in this natural manner. The Chinese people hold these shells in great reverence, believing that Buddha dwells within them. However, should a Christian chance to look upon one of the shells it has no further value to them, as its charm is supposed to have left it.—Scientific American.

Examine Our Christmas Goods

Candies. Menier's, Allegretti's Original, Moses, Apollo, Lovall & Covel and Bunties in boxes at all prices up to \$5.00. Pipes. Merchaum, Bakselite, Calabash, etc., either plain or chased with gold. CLANNISH MANXMEN.

They Still Use Their Own Tongue in Promulgating Their Laws.

The Isle of Man is in the Irish channel, about equidistant from England, Scotland and Ireland and is famed for its lovely scenery, excellent climate and the quaint old world flavor of its places and people.

Home rule has been enjoyed by the Manxmen for many years. Although there are fewer than 60,000 Manxmen, they have their own parliament and courts. The house of keys and the house of lords hold annual sessions in Douglas, the capital, and the laws they pass are read aloud every year from Tynwald hill. The statutes are proclaimed in the Manx tongue, a language as distinct from English as Italian or German.

The Isle of Man was long a bone of contention among the kings of Northumberland, Scotland, Norway and England. The government, as it is in operation today in Hall Caine's island, was established by Orry, a Scandinavian adventurer who made himself king of the island. He divided his kingdom into six shadings, and this division, with four municipal districts, still serves in the election of members of the house of keys. The bishopric of the Isle of Man is declared to have been founded by St. Patrick, who stopped off and established the see while on his way to Ireland.—New York World.

A FAMOUS OLD FLAG.

The Star Spangled Banner of Fort McHenry in 1814.

Hanging from the walls of the National museum in Washington is one of the most famous flags in the world—the star spangled banner that floated over Fort McHenry during the British attack in September, 1814. The flag measures no less than 26 by 36 feet.

At the time of the battle Fort McHenry, just outside the city of Baltimore, was in command of Major George Armistead. The garrison flag that flew from its ramparts was made by a Mrs. Mary Pinkersgill, assisted by her daughter, Mrs. Caroline T. Purdy.

In the battle one of the stars was shot away by a British shell. After the war the banner became the property of Major Armistead and was left by him to his daughter, Mrs. Appleton. It was from the son of that lady, Mr. Eben Appleton, that the museum received it two years ago. The arrangement is that the flag shall remain permanently in the custody of the museum and must not be permitted to leave the building to be exhibited anywhere else. Time has somewhat marred the beauty of the banner, but no American can look at the fading and worn fabric without a thrill. That is the flag that gave birth to the national anthem of his country.—Youth's Companion.

Doughty Berbers.

The ancient Berbers, who still live in the mountain territory of Kabylia, were never conquered by Roman, Goth, Vandal, Arab or Turk. They made their first obeisance before the firearms of the French under the second empire. Through all these millenniums they have lived in their populous villages perched high on the tops of steep hills. Around them in all directions is a zone of trees, with pasture above, beginning at about 3,000 feet, and the oft conquered open valleys below. Here for unknown ages the Berber has lived among and from his trees. There are four staples of life in Kabylia—dried figs, olives, bread and meat. For miles there is one unending succession of villages set in this open forest of figs and olives.—Argonaut.
