

Planting Time is Near

HAD you in mind doing some planting this spring? Had you thought of putting in a few Flowering Shrubs, a Tree or two or perhaps a group of Evergreens? Or did you intend to arrange for that Hardy Flower Border you have wanted for so long?

No better time than the present to get ready, while it is just a little early to do much planting, you should get us to furnish you an estimate, help you to lay out the Beds and Borders, let us tell you what, from over 20 years' experience in Highland Park we have found to be the best in Shrubs, Perennials and other Plants for this locality. Let's help you with suggestions as to what to plant for the best effects in sunny and shady places, where a Pergola would look well, where a new Vista could be created to make your Grounds more interesting, let's show you where some Evergreens and Shrubs with a beautiful Colored Bark should be planted to create a winter effect, let's assist you in locating a spot for the Sundial, the Fountain or the Water Garden, where an unsightly view can be overcome by proper planting.

Besides all this there are a lot of people who for years have called up 85 when they wanted to know about things in general about the grounds. They consider us as an authority on Driveway Construction, Brick and Concrete Walks, Drainage Systems, the preservation of Bluff property, Retaining Walls, the treatment of Ravine Banks, the care of Trees, the Pruning of Shrubs, the care of Lawns, the building of Concrete or Rustic Bridges, Fences, Grape and Rose Arbors and Terrace effects.

No, we are not Jacks of All Trades, but do everything pertaining to Gardening and Beautifying the Homegrounds, we are paying the closest of attention to all that is happening in these lines all over the country, from beautiful Central Park, New York or the North Shore of Boston to Pasadena, California, the Biltmore estate in Ashville, North Carolina away up to Stanley Park in Vancouver, British Columbia. We have been to all these places and many many more, just to find out what others were doing, this, and over 35 years of experience ought to make a man efficient.

Proof, all kinds of it, nothing would please us more than to show you some of the beautiful Grounds we have helped to create along our North Shore, many small little Elms and Maples we planted have grown into wonderful specimens, barren areas have been transformed into charming Landscape effects and hundreds of Homes were made more attractive because we assisted in the laying out and planting of the Grounds.

May be that you want us to help you this spring, whether you have just \$5 to spend or \$5,000, its absolutely no difference to us. While we are in business, we are here to serve you, to please you and we think just as much of the small orders as of the larger ones, but don't get the impression that we have a grudge against the latter. If it is Flowers, Plants, Shrubs or Trees, you want or Garden work done, we can and will please you so give us a chance.

Highland Park Greenhouses

COAL-COAL

Celebrated D. L. & W Scranton

Prices for April Delivery

Large Egg	\$8.00
Small Egg	8.25
Range	8.25

RECAPITULATION

Total amount of road and bridge funds received	\$8988.34
Total amount of road and bridge funds disbursed	\$1776.63
Balance on hand	\$7211.71

SEARCHLIGHTS IN WAR.

How They Are Worked by Distant Control in Land Operations.

In modern warfare the searchlight is invaluable. On dark nights at sea it is the only means of guarding against torpedo boats, which its beams will reveal at a distance of two miles and more.

On shore it is the electric eye of the army. It is carried to all parts of the field of action by motor truck, and the motor that propels the vehicle drives the electric generator that supplies the current for the light.

Most of these field searchlights are not directed by hand, for each instrument is fitted with what is known as the distant control. Two small motors govern the vertical and the horizontal movements of the light. From them, an electric cable runs to the station of the operator, who, although he may be several hundred feet away, can send the rays of the light in any direction he pleases.

According to the Navy and Army illustrated, one advantage of this distant control is that the objects picked up by the beam of light can be sighted more quickly and more definitely, for if the operator stands behind the light and looks along the beam his vision is hampered by a luminous haze. A second advantage is that the light can be placed in an exposed position without endangering the men who run it. Were the operator and officer beside the apparatus they would be certain to receive the fire that is sure to be poured upon a searchlight and would suffer the instant the range was found.

VIRTUE OF AN APPLE.

At One Time the Fruit Was Called the "Food of the Gods."

The apple has become so familiar as the commonest of all fruits that its value as man's greatest friend in the vegetable kingdom may not be fully realized. It was called the "food of the gods" because it was believed to be the magic renewer of youth to which the gods resorted when they felt themselves growing old and feeble.

There have been many mystic traditions about the apple, which has been credited with varied potency. It is the healing fruit of the Arabian tales, Latin chronicles and institutes and early English poems contain many references to it. Scientific analysis of late years has justified all the ancient glorification of this fruit, which has been found to contain albumen, sugar, gum, malic acid, gallic acid, fiber, water and phosphorus.

Malic acid of apples neutralizes the excess of chalky matter caused by too much meat and thereby helps to keep us young. Apples are good for the complexion, as their acids drive out the noxious matters which cause skin eruptions. They are good for the brain.

Cheap Coal for April

Now is the the time to put in next winters supply of coal. After May 1st the prices below will increase 10c per month:

Large Egg	\$8.00
Small Egg	8.25
Range	8.25
Chestnut	8.50
Pea	7.25
Buckwheat	6.00
Solvay Coke	6.50
