Woman's Club
The first of the series of Silver Teas which are being given by the Club was held at Mrs. A. A. Putnam's home on Tuesday. Fifty-four guests enjoyed the afternoon, and were very much pleased to hear Mrs. Cobb, in her usual delightful reading, which was this time the reading of "A Balm For Lovers," from the Saturday Evening Post. The ladies enjoyed a chance to do their fancy work and to chat sociably with the club members. Refreshments were served. It is earnestly desired to have even a larger company on next Tuesday afternoon, when the tea will be held at the home of Mrs. Charles Winston at 532 North Sheridan road.

Moraine Hotel Notes
The Saturday evening dances have been suspended for the summer and hereafter only one dance a week will be given on Tuesday evenings. On each alternate Tuesday there will be a vaudeville dinner-dance in the summer dining room. The next of these special affairs will be given on Tuesday the 13th.

Mr. John E. Boggild, the Danish Consul to Chicago, who with Mrs. Boggild, has been at the Moraine for the past year, has been appointed to the Danish Consulate in London and leaves in a few days for his new post. Mr. and Mrs. Boggild have become very popular among the guests at the hotel and while everyone congratulated them upon this recognition of valuable services, all view their departure with keen regret.

The Tavern Club of Chicago, an association of the principal hotel men of that city, will be entertained at the Moraine on Wednesday, the 14th. The party will start from the Blackstone Hotel at one o'clock and drive to the Naval Training Station to see the drill and parade, afterwards returning to the Moraine for dinner and will finish the evening at Ravinia Park. These meetings and dinners are very popular among the hotel fraternity and the usual good time is expected. Mr. R. C. Tompkins of the Blackstone and Mr. Cushing of the Moraine, are president and vice president respectively.

Presbyterian Church Notes
On Sunday morning special services will be held at the Highland Park Presbyterian church, in observance of the five hundredth anniversary of the martyrdom of John Huss, the Bohemian reformer. The subject of the sermon will be "John Huss, the faithful witness unto death," in which he will be represented as the morning star of the reformation, with practical applications of lessons deduced from his life.

Additional Locals
Mr. A. Bloomfield returned last week from a business trip to New York.
Miss H. Nelson of Brooklyn, N. Y., is the guest this week of Mr. and Mrs. Chas. Brown of Webster Ave.
Mr. and Mrs. John Meyers of Highwood are receiving congratulations on the birth of a son born Sunday July 4th.
Mr. and Mrs. F. J. S. Farrell of Chicago formerly of Highland Park announce the birth of a son, James Sanford Farrell, born Sunday July 4th.

Word was received this week from Mrs. Brown of Panama City Florida, formerly of this city, stating that her husband Mr. Edward H. Brown died at his home Friday morning. A full obituary will appear in next week's Press.
On next Thursday afternoon, children's day at Ravinia Park, the program will be of a different nature than before. Mr. Roethig, who is a skilled singer of hand performer and who has a number of new tricks to delight the children will perform. The program will begin at two o'clock instead of two-fifteen as heretofore.

Notice of Letting Contract
Bids will be received by the foreman of public work of the city of Highland Park on or before five p. m. Monday, July 19, 1915 for the construction of a concrete sidewalk on the north side of Roger Williams Ave. from Sheridan Rd. east for a distance of 1066 ft. in the city of Highland Park, County of Lake and State of Illinois.
Said sidewalk to be built in accordance with the ordinance passed therefore.
Payments will be made in Time Vouchers due September 15th, 1915.
The foreman of public work reserves the right to reject any or all bids.
John Hart, Jr.
Foreman of public work.

to give your bread or pastry an appetizing brown or to cook your steaks or turkey to just the right degree. Sold on the monthly payment plan.
\$5 with order and \$4 per month with gas bill
North Shore Gas Company

Improve Lake Bluff Orphanage
Work is progressing nicely on the new \$30,000 building being erected at Lake Bluff orphanage for the purpose of taking care of the children who have become so numerous there that the old quarters have been overtaxed. The building will be two story and basement and will cost about \$30,000, having 12 rooms. The basement is in and the concrete floor of the first story is in. The contract is in charge of Mr. Stahl of Chicago.
The additional building will care for 75 children—this does not mean new children but means better care for those now there, for, with 150 children at the place now, the present facilities are overtaxed.

CARLYLE AND THE ARTISTS.
His Impatience With Whistler and His Growth at Watts.
In the article on Whistler in "Sketches of Great Painters," by Edwin Watts Chubb, there is a characteristic Carlyle anecdote. Carlyle had seen the famous painting by Whistler of his mother, and this led to Carlyle's willingness to sit for the great artist. "He came one morning," writes Mr. Chubb, "fast down, waited a few moments while Whistler made the final arrangements of canvas, brushes and palette and said:
"And now, men, fire away!"
"When Carlyle noticed that Whistler ignored his injunction and did not think that that was the way to paint a portrait he added testily:
"If you're fighting battles or painting pictures the only thing to do is to fire away."
"On another day Carlyle talked about other artists who had painted his portrait:
"There was Mr. Watts, a man of note, and I went to his studio, and there was much meditation, and screens were drawn around the easel, and curtains were drawn, and I was not allowed to see anything. And then, at last, the screens were put aside, and there I was. And I looked. And Mr. Watts, a great man, he said to me, "How do you like it?" And then I turned to Mr. Watts, and I said, "Mon, I would have you know I am in the habit of wearin' clean linen.""

PROPER COOKING.
It Destroys Bacteria and Makes the Food More Digestible.
Cooking is one of the principal forces in civilization, and it has played a tremendous part in bringing mankind to the high place it now holds.
The principal reason for cooking our food is to destroy disease germs. For many ages no one knew what caused illness, but now nearly all maladies are traceable to these tiny germs, many of which are found in food and can be destroyed only by the heat of cooking.
Man, owing to the very complicated machinery of his body, falls a prey to disease more easily than the animals. Consequently food which an animal can take without harm, may kill a man. Cooking destroys a large proportion of the parasites, microbes and bacteria in food, thus giving man a chance to digest a diet that otherwise would kill him.
In order to achieve the best results in the destruction of bacteria and in the increasing of digestibility meat and other foods should be subjected first to intense heat so as to form a retaining skin, as is done in roasting or broiling. Then the heat should be reduced and kept on for a long term, during which the juices gradually soften the muscular fibers.
This heat acts as a deathblow to the millions of bacteria which would otherwise have found a place in the stomach of the man or the woman who was to eat it.—New York American.

Attitudinous Art.
"I don't seem to recognize your sister. Is this a likeness?"
"Of course not. This is a high art photograph."—Louisville Courier-Journal.

An Exchange All Right.
"Pa, what is a stock exchange?"
"A place, my son, where an outsider is apt to exchange a stock of money for a stock of experience."—New York Mail.

Fast and Peppery
—This Valve-in-Head Motor
The engine is of the Valve-in-head type, full 30 h.p.; responsive, economical, accessible and extra powerful. All valves are enclosed with an effective silencer, producing the most nearly noiseless of all valve-in-head motors.
This motor will deliver 10% to 15% more power than either the L- or T-head type of equal displacement. It can be relied upon to meet the most trying conditions of travel. The simple test of driving will convince you that the car operates smoothly at high and low speeds and has abundant power.
Price of Model 43 \$1,095. Invite us to demonstrate.

Byron's Pet Goose.
Italian goose figured in the long succession of pets Byron kept at one time or another. The Countess Guiccioli told Lord G. that "with all his abuse of England, Byron when in Italy insisted on keeping up old customs in small things, such as having hot cross buns on Good Friday and roast goose on Christmas day. This last fancy led to a grotesque result. After buying a goose and fearing it might be too lean he fed it every day for a month previously, so that the port and the bird became so mutually attached that when Sept. 29 arrived he could not kill it, but bought another and had the pet goose swung in a cage under his carriage when he traveled. After four years he was moving about with four geese."—London Chronicle.

Cruel Thing!
The elderly "girl" was gushing round, as usual, and Molly Smarte was getting tired of it.
"Oh, look here!" cried the would-be youthful dame. "Here's such a funny advertisement in the paper. A beauty specialist says he can make you look ten years younger in twenty minutes."
"How interesting!" exclaimed Miss Smarte, with a smile. "Why don't you try his treatment for—er—an hour or so?"—London Answers.

Experience.
"There's one thing I can say," said the woman who had married twice.
"And that is?" they asked.
"You never appreciate the good qualities of your first husband until you discover the bad points of your second."—Detroit Free Press.

Electricity in the house will play many parts including that of assistant at the toilet table. Here's an example of a device most useful in that department which it will operate—
Electric Curling Iron and Hair Dryer Combined in One Set
The iron, attachable to any lamp socket, rapidly gets hot and stays at an even heat from end to end. Handsomely finished and provided with a connecting plug socket, which facilitates its easy manipulation.
The comb is made of aluminum. It's about as simple and effective a thing as can be found. Some think this comb hair dryer, notwithstanding the merit of the iron is the most noticeable part of the set which sells for
