Number 28

## SYNOPSIS OF LECTURE ON CHRISTIAN SCIENCE

GIVEN BY MR. FRANK BELL, C. S.

Tuesday Evening, Sept. 7 in the Church Edifice. Speaker Introduced by First Reader, R. P. Walker. Large Attendance

Introductory remarks by R. P. Walker. Friends: On behalf of this Church I tender you a cordial welcome, to hear a lecture on Christian Science by a member of the Official Board of Lectureship of The Mother Church, The First Church of Christ, Scientist, in Boston Mass.

Mary Baker Eddy the discoverer and founder of Christian Science did not claim for Christian Science that it was a new religion; but rather that it is a re-discovery of Jesus' teaching and practice.

Mrs. Eddy says in Retrospection and Introspection: "My immediate recovery from the effects of an injury caused by an accident, an injury that neither medicine nor surgery could reach, was the falling apple that led me to the discovery how to be well myself, and how to make others so. The Bible was my textbook. It answered my questions as to how I was healed; but the Scriptures had to me a new meaning, a new tongue. Their spiritual significance appeared; and I apprehended for the first time, in their spiritual meaning, Jesus' teaching and demonstration, and the Principal and rule of spiritual Science and metaphysical healing, in a word, Christian Science."

Jesus healed the sick, cleansed the lepers and raised the dead, he said unto his disciples, Verily, I say unto you, He that believeth on me the works that I do shall he also: (John 14:12). In obedience to Jesus commands Christian Science furnishes absolute proof of its doctrine in the healing of physical disease and of sin, evidence of which can be had any Wednesday evening at any one of the hundreds of Christian Science churches and societies throughout the world, or by reading the testimonies of healing as published in the Christian Science Journal or Sentinel.

If Christian Science was a religion of words only little could be expected of it, but being also a religion of works one has a right to expect and will receive full salvation from all mortal beliefs through an earnest study and application of Christian Science and its teachings.

It can be said of Christian Science in the words of the Master: If I do not the works of the Father, believe me not. But if I do, though ye believe not me, believe the works: (John 10:37-38).

It is with much pleasure that I present to you Mr. Frank Bell, C. S. of Harrisburg, Penn. who will address you.

Mr. Bell's Address

It is the mission of Christian Science to bring to light the fact that man's true selfhood is not separated from the intelligence that makes and governs all. Manifestly a working knowledge of divine law involves and requires a correct understanding of the nature and qualities of the cause or source of all things, the infinite intelligence or divine Mind which is God. In the light of Christian Science man begins to acquaint himself with his Maker by processes as satisfying to reason as those by which the mathematician is assured of the basic elements of the science of numbers.

Christian Science makes it clear that there is a God, and that the Scriptural statements with regard to Him are correct, namely, that He is the one and only creator, having made all that was made; that His creation was and is spiritual and perfect and good, as He is spiritual and perfect and good; and that infinite Spirit is necessarily omnipotent, omnipresent, omniscient; that is, the only power, everywhere present, supreme intelligence. In 1st John it is stated that "God is Love," and Mrs. Eddy, on page 140 of Science and Health, says "The Christian Science God is universal, eternal, divine Love, which changeth not and causeth no evil, disease nor death." It is needless perhaps to add that those to whom this definition of God is appreciable do not think of Him as in the nature of a magnified human being with a material form, occupying a great throne in the sky and dealing with His children in a manner that would be considered reprehensible even in a human parent, bestowing rewards on certain favored ones and punishing others for doing things He is supposed to have made them capable of doing. Christian Scientists learn to question the accuracy of any description of God that does not conform to the highest standards of justice, mercy and love.

## ORGANIZE RIFLE CLUB FOR HIGHLAND PARK

MAYOR HASTINGS BEHIND MOVEMENT

Hopes to Influence National Movement for Municipal Military Practice. U. S. to Furnish Rifles and Ammunition

Highland Park is to take the lead in organizing a municipal rifle club for drilling young men in military tactics. Mayor Samuel Hastings announced Tuesday that plans for organizing the club to be known as the Municipal Rifle Club have been perfected and recruiting will be started soon. Corporation Counsel Samuel Holmes has charge of the recruiting. Mayor Hastings, who is also president of the Illinois Manufacturers' Association, laid his plan before the board of directors of that organization Tuesday and it was unanimously approved. The association adopted a resolution advocating such rifle practice and military drill in every city in the state.

U. S. to Supply Arms. The Manufacturers' Association sent a telegram to Secretary of War Garrison asking the government to make arrangements as soon as possible to supply the required rifles and ammunition, which it was empowered to do under an act of congress.

Mr. Hastings and his associates in Highland Park believe each city should do its part in developing in the United States a trained body of citizens. Military experts have repeatedly pointed out that recruits who have had no military drill are no more than cannon fodder. A year at least is required to drill a recruit properly for the field, the experts declare.

The rifle club at Highland Park will have social features, but the primary object is to recruit the young men of the municipality, supply them with rifles and ammunition for target practice, supply uniforms and competent instructors.

Hope Movement Will Spread. Congress passed an act which provides that where rifle clubs are formed in cities and villages rifles and 125 rounds of ammunition will be supplied each year for practice.

Mr. Hastings proposed at the meeting of the board of directors of the Illinois Manufacturers' Association that each city not only in the state of Illinois but in the United States should create an organization in proportion to its size.

"The young men would be interested in the drill work," Mr. Hastings said. "It would furnish those in the smaller cities with exercise equal to practice in gymnasiums and would keep them off the streets. The instruction which they would receive also would instill in their minds the necessity for defense at all times."

Mr. Hastings took up the Highland Park Club plan with President Wilson several weeks ago and the matter is now in the hands of the Assistant Secretary of War Breckenridge.

## RAIN HALTS MOTORCYCLE DERBY

Chicago's 300 Mile Event Postponed Until Next Sunday Afternoon

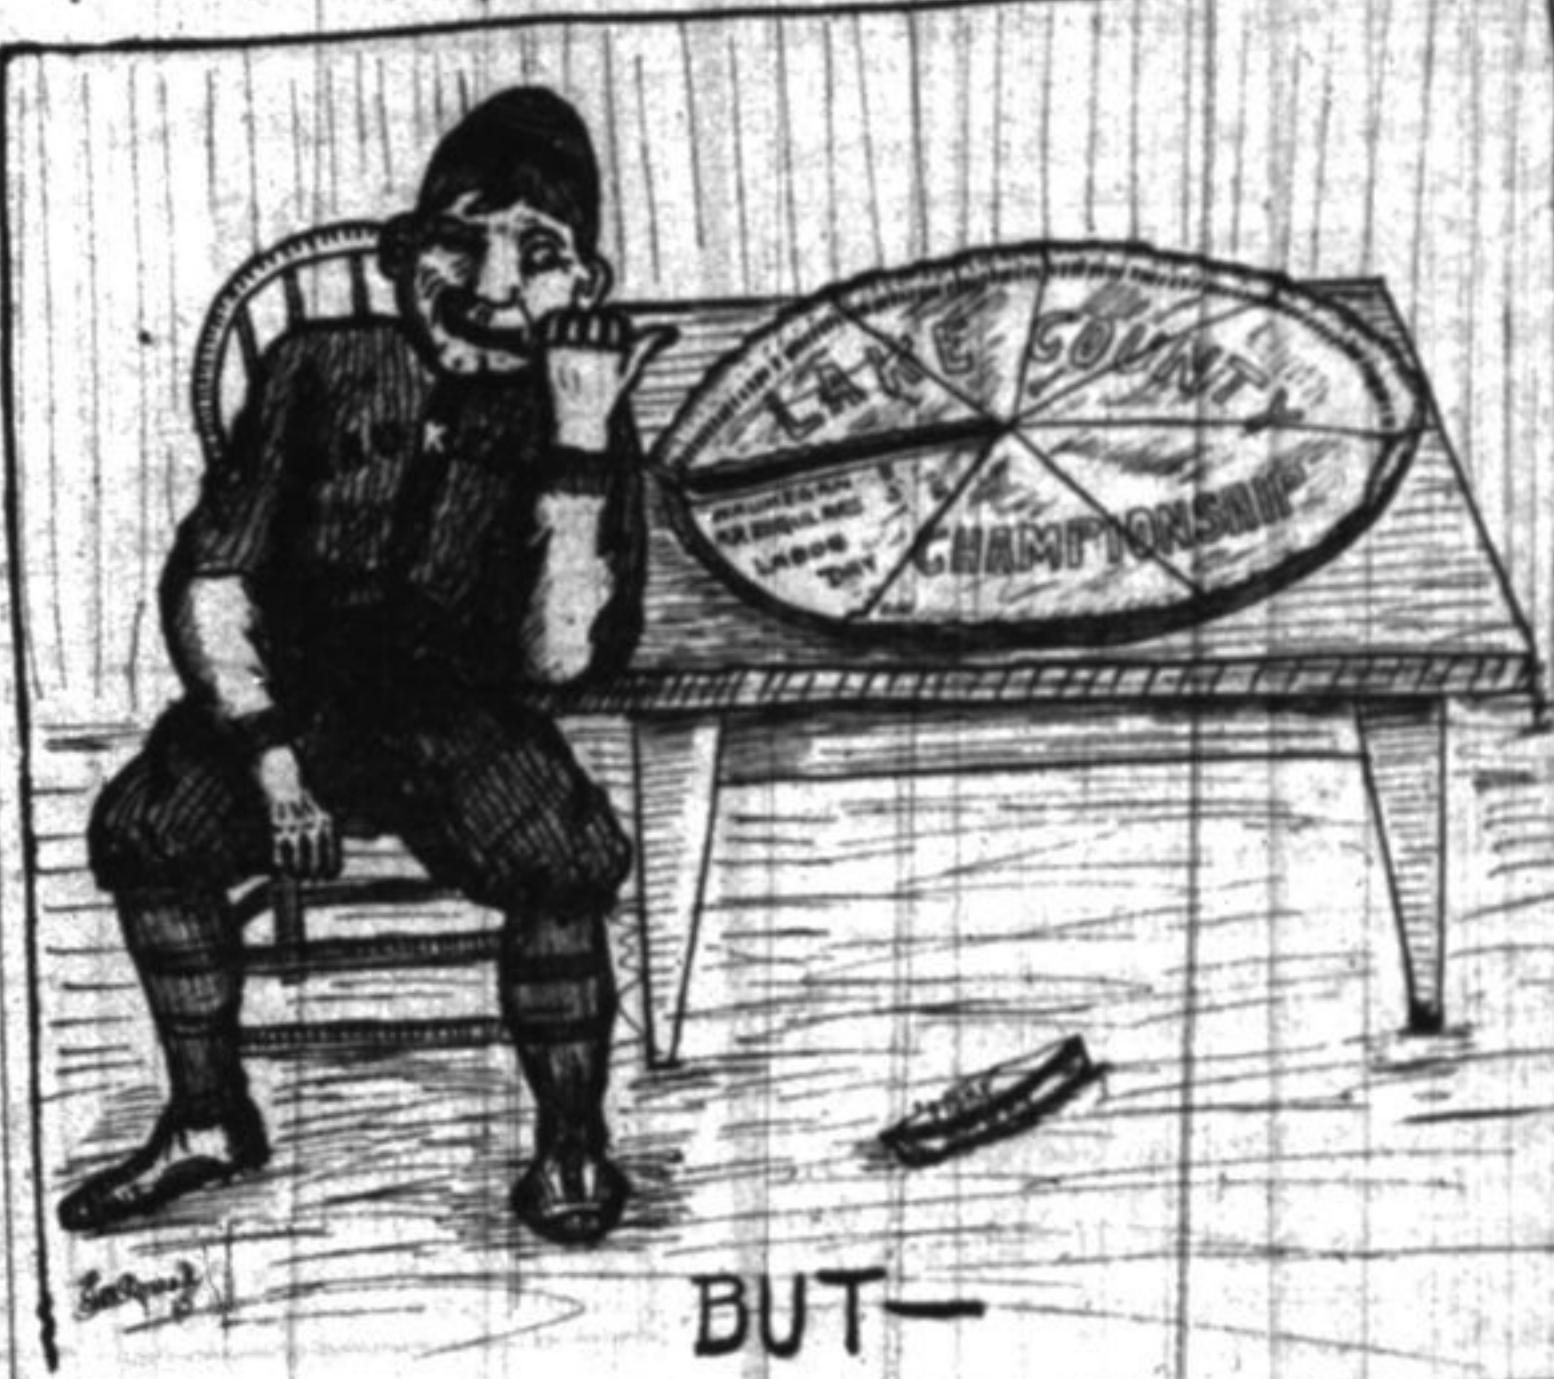

The promoters of Chicago's first American championship 300-mile motorcycle race at Maywood again were foiled by the weather man, an all-night rain causing another postponement of the event originally billed for last Sunday. This time the officials set next Sunday as the day and 1:30 p. m. as the hour for trying again. The race was called off before noon Monday, as the men in charge refused to allow the gas bike riders to risk their necks on the slippery speedway. All the teams entered will remain over for Sunday's contest and the entry list will not suffer by the delay.

## GOOD PROGRAM AT THEATRE

Mary Pickford to Appear on Wednesday. The Galloper on Sunday

Motion picture attractions for the coming week at the local theatre are to be: Sunday, September 12, a Pathe production, "The Galloper," a gold rooster play, in five parts. This famous story of Richard Harding Davis is pictured by Donald Mackenzie, featuring Clifton Crawford. On Wednesday, September 15, Mary Pickford will play the title roll of "Little Pal."

They Got Rid of Fiske Easily—

BUT—

## BUSINESS DISTRICT TO BE ILLUMINATED

"SAMPLE" CONCRETE POSTS INSTALLED

Public Invited to Inspect Lights and Pass Judgement on Them. Hope to Have Work Under Way Soon

The Street Lighting Committee of the Highland Park Business Men's Association and the Lighting Committee appointed by Mayor Hastings to re-perhaps the city, invite the public to inspect and pass judgment upon the sample lamp posts which have been installed by the North Shore Gas Company and the Public Service Company. The Gas Company have installed two beautiful concrete posts of boulevard type at the corner of St. Johns and Laurel Avenues. They are equipped with gas arcs of 150 candle power. As yet the Public Service Company have only one post installed, which is in front of their offices on Elm Place. It is a massive iron post on which is mounted a large pear-shaped globe with a 400 candle power light. As soon as possible they will have on display one of the concrete type.

It has long been the desire of the Business Men's Association to illuminate the business district, and in doing so the committees have the city beautiful scheme ever in mind. They solicit the opinions of the public, after seeing the sample posts now installed. The district to be covered with these posts includes Central Avenue, St. Johns Avenue, First Street and Sheridan Road to Park Avenue.

## NEW "SAFETY POST" TO BE INSTALLED

To be of Reinforced Concrete With White Marble Finish

A new "safety post," which has been purchased by private subscriptions through the efforts of Dr. Lloyd M. Bergen, will be placed at the corner of St. Johns and Central Avenues either the latter part of this week or the first of next week. The post, as shown on the accompanying picture, stands seven feet high, is made of reinforced concrete with a white marble finish, has a shelf for flowers and is equipped with a large red globe. There are several other corners which are greatly in need of "safety posts," and it is hoped that they will be forthcoming in the near future.

## SUNDAY'S BALL GAME TIED TWELVE INNINGS

REGULARS DROP GAME LABOR DAY

11 to 3 Trimming Due to Windness of Fisk Who Pitched for Highland Park. Play at Waukegan again Sunday

The Regulars, together with several hundred fans, journeyed to Waukegan Sunday and Monday to gain nothing but an even break Sunday and a terrible walloping on Monday.

Sunday's game went twelve innings with neither side getting a marker and was one of the best games ever witnessed in Lake County. Although we outplayed and outhit our opponents, the "Umps" seemed to be against us in effective plays. Dave Black of the Chicago Federal League pitched a wonderful game, allowing only three hits and showing his worth in pinches. Stremmel of the opponents, who is known as the best semi-pro pitcher on the prairie, also pitched air-tight ball. Five blows in all we could carry off his offerings. The game was called at the end of the twelfth inning on account of darkness. Featuring plays were those of Kilby, Pettis, Shannon and Reed.

Monday's Game

After much wrangling the Waukegan team consented to allow Max Fisk to pitch for Highland Park. Fisk, a former Federal Leaguer, and recently of the Pacific Coast League, has always been considered an excellent pitcher, but Monday was certainly his bad day. He was wild at the start and as the game progressed seemed to grow worse. He walked four men, hit three and allowed ten scores to pile up before he retired in favor of Blackburn, who finished the game by pitching regular ball. The team in general did not play very well, being kept in hot water by the wildness of Fisk. The final count was 11 to 3 in favor of Waukegan.

Next Sunday the Regulars will again travel to Waukegan to continue their series for the county championship.

## LARGE ENROLLMENT IN ALL SCHOOLS

Changes are Made. Work well Started in All Schools

Elm Place opened on Tuesday morning with an enrollment of 498. The kindergarten enrolled an unusually large number of children; fifty was the enrollment by yesterday afternoon. The interior of the main building has been redecorated, two of the rooms having new linoleum floors with removable desks. The Board of Education has adopted the policy of laying linoleum on all the floors and replacing the fixed seats by the removable ones in all the rooms.

Lincoln School opened on Tuesday with the following enrollment: first and second grades, 30; third and fourth grades, 24; fifth and sixth grade, 29; seventh and eighth grades, 28. Everything is reported as moving smoothly, and everyone is busy.

At Ravina there are enrolled sixty children, which is the largest ever enrolled in the school. Interior decorations have been made which makes the rooms look very attractive. It is reported that a good start has been made on this year's work.

## AUTOMOBILE SPEEDING DISCUSSED BY COUNCIL

MAYOR WOULD WIDEN CERTAIN STREETS

Justice of the Peace A. E. Smith Turned Over \$263 for Fines Collected During the Month of August

By Publicity Commission. There was nothing dull or uninteresting at the City Council meeting last Friday; there was enough outside interest involved to make things lively. Mayor Hastings, Commissioner Bahr, Willits and Huber were in their places when the roll was called. Corporation Counsel Holmes seemed all the better for his business trip to the coast, and ready for the great amount of work which awaited him. Business proceeded in the usual manner, Commissioner Willits reported for Commissioner Hitchcock, who was unavoidably absent. Mayor Hastings spoke feelingly of the two unfortunate motor accidents which had taken place during the week and expressed the wish that something might be done to make automobile driving less dangerous. He suggested that if some of the thoroughfares were widened and some of the corners of streets rounded instead of being square it might help the situation. Commissioner Bahr, who is anxious to do all in his power to avert further tragedies, will make a rigid investigation. It is particularly requested of our citizens who have suggestions to make or advice to offer in this manner that they do so as promptly as possible. It is the desire of the City Council to have this most important question thoroughly looked into and properly handled. A written communication to the city clerk will receive prompt attention. Commissioner Willits suggested that the city bills should be more thoroughly O.K.'d by heads of departments; material received and hours of personal service vouched for before presentation for payment by the City Council.

The policy of the C. & M. E. R. R. in forcing passengers to buy tickets before boarding train is extremely unpopular. Many persons, not realizing till the last moment that it is imperative to have a ticket, have hurriedly crossed the street to the ticket office almost under the wheels of an automobile or other vehicle. A remedy must be found and found promptly. If the C. & M. E. R. R. have a right to oblige persons to purchase tickets, it must put up a booth of some kind near the tracks; we feel sure that Corporation Counsel Holmes will make some satisfactory arrangement with the officials of the road.

A complaint was made by Mr. Cushing of the Moraine Hotel of the wholesale arrests of automobilists for careless and speedy driving; he feels that many of the arrests and fines are unjust and uncalled for, and when asked for specific cases he was ready to give them.

Mayor Hastings remarked that in most of the complaints already investigated the arrest was warranted, but if the persons mentioned by Mr. Cushing had not been fairly treated all reparations would be made and an apology offered, but he wished it to be understood that the safety of our citizens and others passing through Highland Park was the first consideration of Highland Park officials.

A. E. Smith, justice of the peace, reported that he had collected \$263 in fines during the month of August.

Commissioner Willits moved that an ordinance changing the name of Circle Avenue to Crescent Court be adopted. The motion prevailed.

## IT PAYS TO ADVERTISE

Moldaner and Humer Having Big Success With Their Special Suit Sale

As a result of some good, live advertising backed by an extremely attractive offer in gentlemen's made-to-measure suits, Moldaner & Humer have had one of the busiest weeks of their existence in Highland Park. For the special sale they are conducting this week they are occupying No. 8 N. Sheridan Rd. in addition to their regular store. This separates the men's and women's tailoring departments and is a great convenience to those taking advantage of this special offer. Sale closes Saturday.

## RAVINA PARK FROLIC TO BE SATURDAY NIGHT

SPECIAL FEATURES FOR THE CHILDREN

All North Shore Towns will be Represented in Evening Vaudeville. Dinner Dances in Casino

Big plans are all ready for the "Ravina Park Frolic of 1915," to be held on Saturday afternoon and evening of September 11 at Ravina Park, under the auspices of the Ravina Club. In the afternoon there is to be an especially attractive program for the children, which comes as a climax to the Thursday afternoon entertainments for the children which have proven so popular all summer long. The program will begin at 2:30 o'clock and will consist of hurdy hurdy shows, bears and monkey performances, all sorts of side shows, and a beautiful butterfly booth. This will be followed by dancing in the open air ballroom, for the children only. As this is the first time this season that the children have been given the privilege of dancing in the domino casino it is hoped that a good number will avail themselves of the opportunity.

The society vaudeville in the evening, beginning at 8:15, is promised to be the biggest surprise yet. Talent from all along the North Shore is to be represented. Lake Forest is giving Miss Margaret Carey, Mr. William Fuller and Mr. Spencer Logan, who are to appear in a song and dance skip known as "Broadway, Here and There." Highland Park will appear as a group of strolling singers, who are Mr. and Mrs. Carleton Vail, Mesdames Henry Atwater, C. G. Alexander, Robert Buckley, Messrs. Roger Vail, Dudley Putnam, Junior Chandler, George Jones, Robert Hall, and Misses Ethel Spencer and Marjorie Small. Miss Helen Rosenfield will dance her famous bubble dance and also other interpretations. Miss Evelyn Ison of Kenilworth, who has appeared in our home circles before, has been billed for a place on the vaudeville program, while Miss Collette Conant, the famous pianist, who entertained large audiences here last winter, has promised a rare treat for the occasion.

The tableaux given recently at Mrs. Sidney Burnett's home in Winnetka are to be repeated for the frolic. They are: Egyptian Frieze, Fra Angelico's Angels, Gainsborough group and Vogue Covers.

Home-made candy will be sold on the grounds, in charge of the following Highland Park ladies: Mesdames E. E. Tyner, J. M. Tuttle, J. F. L. Curtis, Earl W. Spencer, H. H. Doty, Robert Buckley, C. G. Alexander, W. E. Carr, George Lytton, and the Misses Edith Boynton, Priscilla Carver, Caroline Shields and Genevieve Mott. It is earnestly desired to have much enthusiasm shown in the dinner dances, which are planned to be a big feature of the evening. The decoration plans have been placed in the able hands of Mesdames C. T. Boynton, E. L. Lobdell, Herman Paepche, Edgar Snow and Frank Lincoln Wann. Music for the dancing will be furnished by Mr. James G. Henshel and his orchestra. By courtesy Miss Marguerite Leonard and Mr. George H. Hanauer and Miss Virginia Maltby will give special exhibition numbers.

The various committees have spent much time in making these plans, and have accomplished a great deal of work in the past weeks, and now it is hoped that the public will respond generously to help in every way to make this event one to go down in history as the most successful of the Ravina Club's many activities.

## DR. COCK, FEDERAL INSPECTOR HERE

To Aid in Prevention of Spread of Hoof and Mouth Disease

Dr. J. H. Cock, who represents the federal government in the movement against the spread of the hoof and mouth disease, is stopping at the Highland Park Hotel for several weeks, and any communications concerning the disease will be received by him mornings and evenings at that place, or by telephone 104. Farmers are asked to aid in the prevention of the spread of the disease by keeping their live stock off of the public highways.
