

COUNTRY LIFE

One of the great advantages of living in the Country is to be able to enjoy the wonderful trees the green grass, the birds, the shrubs and the flowers, and there is no home in Highland Park where all of these can't be had.

It isn't a matter of where you are located, how big or small the Home, how limited or extensive the grounds, things out doors can be made attractive.

For over 20 years we have helped to make the home grounds of Highland Park what they ought to be and are still at it, usually we get a hold of a place where the owner of the grounds finds that he has reached his limit and realizes that he is in need of assistance.

May be you are in need of us, you have gotten to a point where you are no longer satisfied the way things look about the place, you see others with beautiful grounds and want to do something to make your home attractive.

If you would just call up 85 for a consultation we could soon convince you what a wonderful change could be brought about in a very short time. It does at cost a penny to get our suggestions or a sketch and estimate of cost—why not go that far at least?

After all is said and thought over it doesn't matter nearly as much just how long we live as how well we live—to live every day and let moderation be the key stone of everything is one of the main requirements in getting the most out of our journey towards the great unknown.

Don't wait for tomorrow in order to enjoy certain things, but put off anything which makes for the ideal home and its surroundings—this doesn't mean to live extravagantly or above your income, it means to create environments around you to make you and yours realize what a wonderful world this is and that the home and the grounds surrounding it are the dearest spot on earth. Live so as to be able to close the books every night—take an interest in gardening—a big live man will chase a little rubber ball with a stick over a 100 acre golf course—the real good coming out of golf is the fact that it brings man in touch with the turf, the trees, the great out of doors it leads many towards digging in the soil, plant things which will develop and grow—what is more wonderful on earth than a 5 cent package of Pansy seed?

Come on out and let's talk things over, less pork tenderloins less sweetbread, less, hot springs and little liver pills—you're not sick, let's get out and plant bulbs now to bloom next spring, let's lay out new flower beds and shrub borders, the little water garden—the present is the time to get busy—sit by the fireside this winter, with your garden magazine and dream of the awakening of spring and what it will have in store for you all that you have to look forward to.

Look out of your bed room or dining room window and be hold the snow covered pine and spruce, the birds after the red berries of the barberry and a little later the crocus to greet you as messengers of spring—we are among the few fortunate enough to live in the country—are you taking advantage of it.
