

Arcady Farms

Producers of the natural raw Milk

Pure Natural Milk is superior to treated milk in every way. It is not only safe but it must also be Clean milk in order to eliminate the necessity of pasteurization. For this reason alone it appeals to the refined taste of every milk consumer. Natural milk is rich in amino acid, the form in which proteins are assimilated into the circulation. It is also valuable for its content of mineral salts. Milk contains more calcium salts in solution than lime water and they are more available for nutriment of the body. By the process of pasteurization however these are greatly changed and are not as readily assimilated. Nothing is done to the Arcady Farm Milk except keep it pure. It is delivered direct from the farm to the consumer, strictly fresh, absolutely clean and safe for everybody.
