Mr. Bryan announces, "That he is good for twenty years." We had about decided that he was good for nothing.

Waiter, please ask the leader to play an old fashioned waltz; we're sick of fox trots.

Whaddayemean HIGH TAXES?

Yes, Central, you did give me the right number; thank you very, very much indeed.

This Villa person looks like one reason for "Preparedness." His jaunt into Columbus, N. M., will make history. Columbus discovered America. We hope Villa discovered that some of those Texans who live near Columbus still remember the Alamo.

Our sympathies go out to the immaculate Conception School.

Rookie Camps ought to be filled this summer.

If George Edmund Foss does not get re-elected, it won't be our fault. He voted for his country's honor. He was more of a "man" than the minority leader.

A mighty good friend of Highland Park is taking a rest in Georgia and Florida.

We hope "Cub" Moon and the bowlers won't go into eclipse at Indianapolis.

Atlanta, Ga., March 15th: The students of one of the high schools in this city signified willingness to take up military training voluntarily, at a preparedness discussion recently and informed Governor E. N. Harris, of Georgia, who spoke at the meeting, that it was their desire to train as reserves for the United States Marine Corps. If the school authorities sanction the movement, the Atlanta Marine High School will be the first in the United States. The United States Marine Corps has no reserves, and, in time of war, could have the assistance of only one company of marine militia from Massachusetts. The students are delighted at the prospect of training for "soldiers and sailors too."

Deerfield-Shields High School will have competition.

Highland Park men have an opportunity for real service this summer. The Army Rookie Camp is announced for Indianapolis, Ind., but there will be a Navy Camp at Great Lakes. There should be ten recruits from Highland Park. We know of five, already.

Here is a story told for professional platform people by the Lyceum World: One day a visiting clergyman, who was to preach before the students at Yale University, asked how long he was expected to talk. "Of course, we put no time limit upon you," replied President Hadley, with his usual pump-handle gesture, "but we have a feeling here at Yale—that no souls—are saved—after the first twenty minutes."

Highland Park Club

"The Bohemian Girl" in motion picture at the club on Friday evening served to attract quite a number of people. The music was taken from the opera and fitted very well with the pictures. A comedy, "The Parson's Horse Race," preceded the operatic piece and was very humorous, pleasing the company as a whole. The motion pictures tomorrow evening will be Richard Harding Davis' comedy drama, "The Galloper."

On Tuesday evening the twenty-first, cards will be the feature.

SYNOPSIS OF LECTURE ON CHRISTIAN SCIENCE

GIVEN BY JOHN W. DOORLY, C. S. B.

Tuesday Evening, March 7, in the Church Edifice. Speaker introduced by Mr. H. M. Slaymaker of Lake Bluff

Progress is recognized to be the law of God in all things, and Christian Science has come in obedience to this law, not to reveal a new God but to bring to humanity a fuller sense of what one and only God "whom to know aright is Life eternal." (Science and Health, Pref., p. vii.) The message of Christian Science is always loving, compassionate, and tolerant, and recognizes clearly the right of every man to decide what is best for his own health and happiness, both in the matter of medicine and also of religion.

Christian Science, however, does declare in no uncertain way that there is but one God and one Christ, and that a correct, scientific, and demonstrable understanding of the one and only God and of the divine Christ is essential to the permanent health, happiness, and salvation of every individual.

Christian Science therefore demands from those who would accept its ministrations that they should so understand God and His relationship to His creation, and His laws governing this relationship, that they should be able under all circumstances, through this knowledge, to prove His presence and power, and His infinite ability to preserve them intact from every form of evil. This result Christian Science teaches, and all Christian religions should readily concede, can only be accomplished through prayer; but as to what constitutes true prayer there are many human opinions.

The question therefore arises, What is the nature of the prayer of Christian Science, and wherein does it differ from the ordinary religious acceptance of prayer; and primarily, does it agree with prayer as understood and practiced by those men of old whose perception of true prayer has based all religious teaching? Also, does it agree with the prayer of Christ Jesus the Wayshower?

To prayer aright it is evident that we must first know God aright, for it would be useless to pray to something that we did not understand.

The key-note of Christian Science teaching truly is its demonstrable explanations about God, since all that can ever be accomplished for the good of mankind must be as a result of knowing the one infinite God, Good.

An important revelation of Christian Science is that God is Mind, or as Jesus declared, Spirit, and when an inquirer begins to perceive this vital fact even in the slightest degree, he at that moment begins to understand somewhat of Christian Science.

To be intelligent, God must be Mind, for if He were not Mind He would be non-intelligent or mindless, and since there is but one God, there can be in reality but one Mind.

As there is but one God or cause, this cause must necessarily be omnipresence, that is all presence; omnipotence, that is all power; and omniscience, that is all Science or true knowledge, for if the one and only cause were not omnipresence, omnipotence, and omniscience, then there would be a time when being would be without presence, power, or knowledge.
