54 of the 64
Statistics of a big life insurance company show that beginning with 100 healthy Americans, we find 64 living after 40 years, and 54 of the 64 dependent upon relatives, friends or public charity.
This is indeed food for serious thought. Will you be one of the 54? Emphatically, No. Banish the thought to-day by planning and providing at least a modest contingency. Persistent, systematic saving will do it.
Begin to-day with one productive dollar at the

Cheaper and Better Than Hard Coal Guaranteed to Give Satisfaction
Chicago Solvay Coke
"The Fuel Without a Fault"
Some Facts About Solvay Coke
From Sept. 1, 1914 to Jan. 31, 1915 I sold 190 tons of Solvay Coke. Over the same period this season Sept. 1, 1915 to Jan. 31, 1916 I sold 614 tons of Solvay Coke. These facts speak for themselves. If Solvay Coke did not give satisfaction in every respect I would not be selling three times as much as I did last season.

EASY TO PROVIDE FOR YOUR OLD AGE
Young Man Can Double Income by Middle Life.
FIVE DOLLARS EACH WEEK.

In Twenty-eight Years Principal Will Amount to \$17,779.22 and Income From This Sum Invested in Six Per Cent Mortgages Will Be Upwards of \$20 Weekly.
This is not a get-rich-quick scheme. It is simply a plain statement of how any industrious young man who sets about it early enough can double his income by middle life simply through \$5.00 weekly savings and wise investment of them from time to time.
Let us assume that you are in your twenties and that you are earning \$20 a week, \$1,040 a year.
In order to equal that income through 6 per cent investments you would need a capital of about \$17,300.
Here is how you can do it before you have passed your prime:
Suppose you open a savings account in a bank which pays 4 per cent interest on savings, compounded semi-annually.
Save and deposit in the bank \$5 every week.
Whenever your principal and interest equal or exceed \$1,000 draw out that sum and invest it in a first mortgage paying 6 per cent a year payable semi-annually. Likewise deposit your mortgage interest in your savings account, continue to withdraw and invest whenever your savings account reaches the \$1,000 mark.
In 28 years your principal will amount to \$17,779.22 and your income

DO NOT CARRY YOUR MONEY WITH YOU.
You can't spend what you do not have. Money in the pocket burns. It is easy to say "no" to some alluring window or appealing advertisement when you have no money with you, but when the purse is full, how hard to turn away! You can't go if you haven't the price of a ticket; but how much better to stay at home when you have a ticket with you! To carry money around and be able to say "no" to the many opportunities that appeal to you to spend is to develop character, resisting power, reserve and strength. It means that you know yourself and can conquer yourself. But until you are strong enough to say "no" and stick to it, you had better let the bank do the resisting for you, for this is what banks are for. You can't spend money while it is in a bank.

from this sum invested in good 6 per cent mortgages will be upwards of \$20 a week. This is how it figures out: \$5.00 per week deposited in bank at 4 per cent per annum compounded semi-annually will amount to \$1,123.89 in four years.
You take out \$1,000 and invest it in a first mortgage at 6 per cent. Balance on Savings Account, \$123.89.
In seven years the amount in the savings bank will be \$1,154.89. Another \$1,000 is taken out and invested leaving \$154.89 remaining.
At each period of nine and one half years, eleven and one half years, thirteen and one half years, fifteen and one half years, seventeen years, eighteen and one half years, nineteen and one half years, twenty-one years, and each year until the twenty-eighth year one thousand is invested. Seventeen thousand dollars will have been invested in mortgages, and a balance of \$779.00 will be remaining in the bank at the end of the twenty-eighth year.
This amount, at 6 per cent interest, yields \$1,068.02 a year, or \$20.51 a week.

The Saturday Evening Post a few years ago gave an interesting calculation that if a man whose income remains the same year after year will deposit one-third his income each month in a savings bank that pays four per cent, he will be able to retire at the end of thirty-five years, and thereafter he or his heirs will receive the full amount of his income.
If he will steadily deposit one-quarter of his income in the same way he will be able to retire on full pay at the end of forty-one years.
A fifth of his income saved and deposited in this way, will enable him to stop work on full income at the end of forty-six years, while a deposit of one-tenth of his income will retire him at the end of the sixty years.
To be able to retire on half income as a result of this kind of steady saving is easier. This can be achieved in twenty-four years by the deposit of one-third of the wages in a savings bank each month; in twenty-eight years by the deposit of one-fourth of the wages; in thirty-two years by the deposit of one-fifth of the income, and forty-five years by the steady saving of one-tenth of the wages.

The nation-wide campaign which the American Bankers' Association is conducting encourages systematic saving and wise spending of money through the keeping of a budget of private expenses.

Waukegan to Vote on Recall
Special Election will be Held Within Sixty Days
Within sixty days time a special election will be held at which time Waukegan voters will be afforded the opportunity of voting on the proposition to recall the commission form of government.
Objectors to the recall petitions filed by Messrs. Schwartz, McCann and Sheridan, abandoned their fight to prove the petitions invalid on Monday. It is believed that the election will be held on or about May 10th.—Waukegan Sun.

The Greer Chemical Co. Chicago, Illinois April 21, 1915
Purity Ice & Refrigerating Co. Highland Park, Ill. Gentlemen: The sample of water which you submitted to us for analysis taken from our Water Purifier and Filter showed that it contained four grains of lime per United States gallon. The mud, silica, organic matter and bacteria was all removed, that the water is absolutely pure and the ice that you are making is better than any that is made in the city of Chicago or any suburban town.
Very truly yours, The Greer Chemical Co. Roland C. Greer, Gen'l Mgr.

Lincoln School
On account of misunderstanding there was no exhibit of domestic science from this school at the Ossoli Domestic Science Day. Mrs. Freeman has charge of the seventh and eighth grade sewing, and Miss Faxton of the fifth and sixth grade sewing, and under this able direction the girls have done remarkably fine work. Later on in the season, however, there is to be an exhibition of all work done in the school.
The children are already beginning to show a great interest in a school garden which will be planted as soon as the planting season comes. This work which is under the direction of Miss Da Carna is planned so as to give the child an incentive to plant a home garden. The children are also beginning to enjoy the flowers from bulbs planted in the fall, daffodils and tulips are in the collection.
The boys of the manual training classes have made bird houses and feeding boxes and are going to put them up.
The spring vacation this year will take place the last week in April.
