

Independence Day

It is proper and fitting that we should celebrate annually the glory and blessing of our national independence.

It is equally proper and highly important that every man, woman and child should look forward and blaze the way toward individual independence.

This bank helps you along on the road to individual independence by accepting your surplus earnings, investing them safely and paying you interest on the same. We invite you to start today.

A LITERARY RIDDLE.

Why Does a Woman Write Differently From a Man?

Why is it that you can always tell a story written by a man from one written by a woman? I saw the thing put to a rather severe test within the last month, with results that were startling.

Ten men and women, all of whom do considerable novel reading, had had dinner together. One of the men asked the question I put at the top of these paragraphs. He was in his own home and went to some trouble to prove that the sex of authors is an easy thing to determine.

Giving to each of the nine others a pencil and piece of paper, the host proceeded to read extracts from twenty different books and magazines, selecting parts in which proper names would not identify the story. As he read each person wrote down his guess as to whether the author was a man or a woman.

Of the 180 answers made by the nine persons to the twenty tests all but eight were correct. As he kept the books from which he read concealed it was impossible to get aid with the eye.

But although everybody guessed right almost every time, no one could still give a good definition of the conundrum. Why does a woman write differently from a man?—Philadelphia Ledger.

INFLAMMABLE BOMBS.

Substances Used in the Making of These Deadly Explosives.

The incendiary bomb used by the Zeppelin aircraft, as a rule, is conical, of ten inch diameter at the base, wrapped round with tarred rope and having a metal handle at the apex. The base is a fat cup, into which a pierced metal funnel is fitted, having the ignition device and handle fitted at the top.

The funnel is generally filled with thermite. The latter, upon ignition, generates intense heat and by the time of the concussion has taken the form of molten metal, having the extraordinary high temperature of 5,000 degrees F. The molten metal is spread by the concussion.

Outside the funnel is a padding of a highly inflammable or resinous material, bound on with an inflammable form of rope. The resinous material creates a pungent smoke.

There is generally some melted white phosphorus in the bottom of the cap, which develops nauseous fumes. In some cases celluloid clippings are added, and occasionally a small quantity of gasoline.—Philadelphia Press.

Buildings.

Buildings are contrivances which surround trouble, despair, pleasure, entertainment, business, indolence and plumbing.

Buildings are built with brick, mortar, cement, wood, steel and mortgages. It also takes sand to build buildings, but they should not be built on sand.

Some buildings are public and some are private. Public buildings are usually very imposing, and usually the public has been imposed upon to build them. Private buildings are frequently private in name only, especially if occupied by several inquisitive women. Such buildings are made up of a large number of stories and most of them are without foundation.

Rats, mice, flies, earthquakes and rent collectors are buildings' worst enemies.—Judge.

Long Days on Uranus.

Uranus can be claimed for a British planet. It was discovered at Bath in 1781 by the elder Sir William Herschel the musician who became private astronomer to George III. Uranus is so distant from us and has an atmosphere so dense that little is known about the rotation, position of the axis or number of the satellites. But the inhabitants, if they exist, may console themselves for living in a temperature approaching zero with the fact that they can seldom be dunned for income tax, because their year contains more than 30,000 days.—London Mail.

The Bull of Perillus.

Perillus of Athens is said to have invented for Phalaris, tyrant of Agrigento, 570 B. C., a brazen bull which opened on the side to admit victims who were to be roasted by the fire which was built underneath. The dying groans of the sufferers resembled closely the roaring of a mad bull. Phalaris greatly admired the invention and by way of test roasted the inventor first. Later the populace rose in rebellion and burned Phalaris.

Venison.

The prime joint of venison is undoubtedly the haunch, though a shoulder or neck of venison properly cooked is a very toothsome dish. The loin is best cut up into chops and cutlets, the breast being only suitable for soups, ragouts and pies.

Valuable Ground.

Edythe—Did the duke say he loved you? Kate—He said he loved the ground I walked on. Edythe—Where were you when he said it? Kate—On visiting papa's gold mine.—Pall Mall Gazette.

Diplomatic.

Father—Can the girl you are courting make a good batch of bread? Son—I can vouch for the fact that she can handle the dough all right.—Baltimore American.

Hold faithfulness and sincerity as the first principles. Sincerity is the way of heaven.—Confucius.

Purity Ice and Refrigerating Company

16-24 Deerfield Avenue. Chicago Laboratory 25 E. Washington St., Chicago

If you want Ice Absolutely Pure it is Manufactured at this Plant.

The Greer Chemical Co. Chicago, Illinois

The specimen of Filtered Ice Water from your plant received April 26, 1915 shows on examination: The water plated on special media and incubated at 37 degrees C. for 48 hours shows 13,800 bacteria per cubic centimeter. Gas formation 12 per cent. Acid production none. Presumptive test for presence of sewage contamination (colombacilli) negative. This water is safe potable water.

Purity Ice & Refrigerating Co. Highland Park, Ill.

The sample of water which you submitted to us for analysis taken from our Water Purifier and Filter showed that it contained four grains of lime per United States gallon. The mud, silica, organic matter and bacteria was all removed, that the water is absolutely pure and the ice that you are making is better than any that is made in the city of Chicago or any suburban town.

Very truly yours, The Greer Chemical Co. Roland C. Greer, Gen'l Mgr.

Exmoor Club Notes

The following golf was played on the Fourth. Contest for the president's cup, 36 hole medal play handicap, George E. Moore, E. Page, A. H. Pixley, R. R. Whitman, B. H. Herman, L. S. Gordon, R. A.
