The baker, of course, is out for the dough.

How do you like our new autumn so far this year?

If we lived in New York we would rather strike than work.

Not everybody can achieve greatness, but everybody can be clean.

No chance of converting the yellow journals as long as the scarcity of white paper lasts.

Colleges grow hoary with age as session after session begins, but the freshman changeeth not.

Philadelphia must have a hard time trying to love both of her ball teams the same.

The conference in New London might with profit turn their attention for the time to conditions in New York city, where the need of pacification is rather more urgent than in Mexico.

Football is again trying to elbow baseball out of the way, but it can't make much headway in this part of the country until the world's series closes.

"Every time the price of bread goes up the administration loses more votes," says the New York Sun. Votes of the wheat growers?

Experts who are worrying because we are exporting such large quantities of wheat and corn seem to forget that we have a large amount of grain left over from last year's crop.

We shall be pleased to give special mention with commiseration to any college that opens this fall without the "largest class on record."

The constantly increasing number of automobile accidents at railroad grade crossings prompts the issuance of this warning to all who own, drive or ride in automobiles to STOP, LOOK and LISTEN before passing over any railway grade crossing. If every person who owns, drives or rides in an automobile will STOP, LOOK and LISTEN at grade crossings, the danger will be entirely eliminated.
