## What is Pasteurized Milk?

Pasteurized Milk is Good Clean Milk heated to approximately 145 degrees Fahrenheit and held at that temperature for 30 minutes, then cooled suddenly.

This process in no way destroys the nutritive value of the Milk. It does however, destroy harmful germ life that Milk may contain.

We say "may" because there is always a chance that Milk "may" contain harmful bacteria no matter how carefully handled before it reaches us. So to Safeguard you we Perfectly Pasteurize it—then cool it—then automatically bottle and cap it. So it comes to you untouched by human hands.

## Like getting back home for Thanksgiving—they satisfy!

Thanksgiving with the old folks at home—it does satisfy! For your smoking, Chesterfields do the same thing—they satisfy!

But Chesterfields are MILD, too—that's the wonder of it.

Don't expect this new cigarette enjoyment (satisfy, yet mild) from any cigarette but Chesterfields, because no cigarette maker can copy the Chesterfield blend—an entirely new combination of tobaccos and the biggest discovery in cigarette making in 20 years.
