Old Style

Above is the old-fashioned type of automobile spring still being used by many motor car manufacturers.

It gives the car a violent "throw" on every rebound.

Most of the automobiles that ride uncomfortably do so on account of the "throw" in this kind of spring.

They are back breakers.

New Style

Above is the up-to-date easy riding spring. It is the well known cantilever type.

This spring absorbs all shocks, jars and jolts.

It is the easiest riding spring in the world.

It is used on the famous Overland 75 B—\$635—f. o. b. Toledo.

HEADS OF ODD SHAPE.

The Kilon, Lafton and Maqbon as described in the Talmud.

It is a matter familiar to every student of the Bible that the Hebrew priests were required to be physically as well as morally perfect—without a bodily defect or blemish—in order to be eligible to service in the temple. The Talmud, in the tractate Bechoroth, says a writer in the Medical Record, enumerates several defects which disqualify a priest from ministering in his holy office. Among these are the kilon, the lafton and the maqbon.

The condition of kilon is ascribed as a person having a peculiarly shaped head, which is pointed at the top and broad at the bottom. The lafton was a man with a head shaped exactly the opposite of the preceding. To use the expression of the Talmud, he had a head very broad at the top and narrow at the bottom, like a leaf—i. e., a pumpkin.

The expression maqbon, derived from the word hammer, refers to a hammer shaped head or, as the Talmud describes it, one with a prominent and projecting forehead and occiput.

The terse descriptions of the kilon head and lafton head given by the Talmud could not be improved on by any modern textbook in medicine.

Osman Pasha's Daring.

One of the most gallant generals that ever surrendered to the enemy was Osman Pasha, the immortal defender of Plevna. Surrounded by an immeasurably superior army of Rousias, Osman kept his flag flying for 142 days, inflicting a loss of 40,000 men on the enemy and losing 30,000 of his own garrison. It was only when both provisions and ammunition failed that he decided on that desperate attempt to cut his way through the investing army. The attempt, one of the most daring and resolute in history, failed, and Osman was at last compelled to admit defeat. So impressed, however, were the enemy with his valor that as he was carried wounded through their ranks they greeted him as a conqueror with cheers and presented arms.

Two Days in One.

Chatham Island, lying off the coast of New Zealand, in the south Pacific ocean, is peculiarly situated, as it is one of the few habitable points of the globe where the day of the week changes. It is just on the line of the demarcation between dates. There at 12 noon on Sunday Sunday ceases and instantly Monday meridian begins. Sunday comes into a man's house on the east side and becomes Monday by the time it passes out of the western door. A man sits down to his noonday dinner on Sunday, and it is Monday noon before he finishes it.—London Globe.

Sure.

Mrs. Smiley—Here we've been married ten years, and my husband still says I'm an angel. Her Friend—But does he really mean it, my dear? Mrs. S.—Perhaps not. But don't you think I'm lucky to have a husband who pretends to mean it?—Pittsburgh Chronicle-Telegraph.

Architecture.

A distinguished philosopher spoke of architecture as frozen music, and his assertion caused many to shake their heads. We believe this really beautiful idea could not be better reintroduced than by calling architecture "frozen music."—Goethe.

"They do more than please your taste—they satisfy!"

That's why Chesterfields are like a good cup of coffee—they taste fine and, in addition, they satisfy!

But, besides letting you know you've been smoking, Chesterfields are *MILD*, too!

Chesterfield is the one cigarette that can give you this new delight (*satisfy*, yet *mild*), because no cigarette maker can copy the *Chesterfield blend*—an entirely new combination of tobaccos and the greatest advance in cigarette blending in 20 years.
