VALUE OF BORIC ACID.

Its Use as a Disinfectant and as a Healing Remedy.
A physician writes to Farm and Fireside saying "that the very best disinfectant known to science does not seem to be known to some people at all."
"I allude to boric acid or, as some people call it, boracic acid. It is exceedingly efficient, safe and economical. It is a white powder and makes the best dressing for wounds that modern doctors have ever discovered."
"In using peroxide or hydrogen it is always necessary to remember that while it is a disinfectant it is not a healing remedy at all, as it is acid in reaction and stimulating rather than healing to wounds."
"Boric acid is mild and safe in its action, promotes rapid healing of wounds, can be used as a dressing powder or dissolved in water as a cleansing solution. Boric acid in solution makes an excellent gargle for sore mouths or a lotion for sore eyes, and as it is not at all expensive a pound box of it should form part of the domestic supplies of every family."
"Always remember that boric acid is nonpoisonous in an ordinary quantity usually used, while bichloride of mercury and carbolic acid are exceedingly poisonous."

WHEN A WHALE BLOWS.

It is Steam, Not Water, the Cetacean Spouts into the Air.
Since a whale breathes air when it is below the surface the breath must be held, for if water should be taken into the lungs the animal would drown. Thus as soon as a cetacean comes to the surface its breath is expelled and a fresh supply inhaled before it again goes down.
The breath which has been held in the lungs for a considerable time under pressure is highly heated, and as it is forcibly expelled into the colder outer air it condenses, forming a column of steam. A similar effect may be produced by any person if on a frosty morning the breath is suddenly blown from the mouth.
That whales spout out of the blowholes water which has been taken in through the mouth is probably more widely believed than any other popular misconception. As a matter of fact, such a performance would be impossible, because a whale's nostrils do not open into the back of the mouth, as do those of a man, and the animal is not able to "breathe through its mouth," as can ordinary land mammals.—Roy Chapman Andrews in New York Independent.

For Bald Heads.
"Hope For the Bald Heads" runs an advertisement.
"Hope be followed! What we want is hair.—Boston Transcript.

GREAT SALT LAKE.

Its Water is Saline Simply Because It Has No Outlet.
Great Salt lake has no outlet. The Jordan river, which enters it from the south, is the outlet of Utah lake. Bear river, coming from the north, carries the outflow from Bear lake. The waters of Utah and Bear lakes are fresh, and so is the water of Weber river, the third great tributary of Great Salt lake, but the lake into which the three rivers flow is saline. It is saline because it has no outlet.
The fresh waters of the rivers contain some saline matter, but the quantity is too small to be discovered by taste.
As stated by the chemist, in parts per million, the quantity seems minute, but when account is taken of the total volume of water brought by the streams to the lake in a year their burden of saline matter is found to be really great, amounting annually to more than 500,000 tons.
Year by year and century by century the water which they pour into the lake is evaporated, but the dissolved solids cannot escape in that way and therefore remain.
They have accumulated until the lake water is approximately saturated, holding nearly as much mineral matter as it can retain in solution. The lake contains over 5,000,000,000 tons of common salt and 800,000,000 tons of glauber salt (sodium sulphate) as well as other mineral matter.—New York Telegraph.

ROMANCE OF THE BAHAMAS.

Life in Nassau Was Once a "Purple Princely Thing."
During the American war between the states Nassau of the Bahamas was very much on the tongues of men, as the devil-tug-emporium of contraband cotton, whereby hangs many a dashing sea-story, some of which you can still hear from the lips of the men who took part in them.
The whole history of the Bahamas, since Columbus made his first landfall in the western seas on Watling's Island, has been a fantastic record of desperate opportunism. The prose of "legitimate" business has seldom dulled the edge of precarious prosperity on these derelict islands, whose very existence still seems at the grudging mercy of the sea.
Buccannering, wrecking and blockade running—no more tedious employ than these masculine professions occupied the Bahamians for generations, and so long as there were merchantmen to be boarded or scuttled, rich cargoes to be harvested from the white fanned reefs or cotton to be run to Wilmington at a profit of \$100,000 the trip life in Nassau was a purple princely thing, and even the shoeblacks in Bay street played pitch and toss with gold.—Richard

COUNCIL PROCEEDINGS

Continued from page 1
Interest in the proposed plan for Ravina that we feel sure that the plan will soon be an accomplished fact. Communications from Mr. Lewis and Mr. Forrest were read by the City Clerk, and then the meeting adjourned.
We understand that one of the writers for the Saturday Evening Post, who was in Chicago at the time of the North Shore Municipal dinner, became so much interested in the general scheme of the organization that he prolonged his stay in the city in order to get facts and figures; we may therefore look for some good reading shortly on this subject in this well-known periodical.

SCOTS AS FIGHTERS.

They Won Fame in Former Days Under Many Different Flags.
It would be difficult to find an army in Europe which did not contain descendants of the Scottish soldier of fortune. In Sweden Gustavus Adolphus had four lieutenant generals, twenty-two colonels and many other inferior officers, all Scotsmen, in his service. He owned that his conquests in Germany were due to the valor of these gallant soldiers.
In Muscovy the Bruce, the Gordon and the Douglasses were famous.
Even in Germany the ubiquitous Scot was to be found, and a General Orlevy, whose grandfather was a Scotsman, was at one time field marshal of the empire.
It was in France, however, that the Scot was rated most highly, and the old saying ran, "Fidele epine en Escosse." Louis had such a respect for these soldiers that he ordained that his body should be guarded night and day by twenty-four Scotsmen. This Scots bodyguard was continued under the reign of nine kings without intermission for 150 years.
King Charles VII. raised another company of Scots, called "Gens d'Arms d'Escoce," consisting of 100 horses and 200 archers. This force had precedence of all the French troops.—London Chronicle.

Withering.
Enoch Eastman, an old time Iowa lawyer, on one occasion appeared before a young judge and to enforce a point he desired to make brought with him and attempted to read Blackstone to the court, whereupon the young judge, after moving uneasily about in his seat for awhile, said, "Mr. Eastman, I've read Blackstone."
"Oh, hev' ye!" responded Enoch, looking at the judge over the top of his spectacles with an air of surprise
