There's side of the harbor of San Vicente, the dark gray volcanic rocks, the crest of which forms an exact likeness of our immortal George, seemingly lying face upward, as if in a peaceful sleep. The hero's large, bold features, the backward wave of the hair, his massive shoulders and even the frill of the shirt front are all reproduced on a gigantic scale with wonderful exactness. The strange monument, sharply outlined against the deep blue of the tropical sky, is one of the first objects that meet one's eye in approaching the

Venus and Jupiter.

The "earth's twin sister," Venus, is 67,000,000 miles from the sun. It receives more heat than we do. Very little is known of Venus, and so few markings are seen that it is not known whether Venus rotates on its axis once in twenty-four hours or once in 22

Jupiter, the giant of the sun's family, is covered with a shell of clouds which change so rapidly that contions there can be interpreted only in one way-that Jupiter is so large and It has cooled so slowly that it is still far too hot to support life.

Value of Knowledge.

Knowledge is like the coin of exchange. A man is justified, to a degree, in taking pride in its possessio if he himself worked over the gold o he came by it benestly, already tested passerby who threw it into his face, then what ground has he to boast of it?-John Ruskin.
