

BOND ISSUED PROPOSED FOR ILLINOIS ROADS

Continued from page 1
That wherever one of said proposed State roads runs through or into a county over a paved road that has already been improved by the county and State jointly, or by the county alone and accepted by the State, then in such case, if such paved road can be utilized in the State-wide system, the money value of said paved road at such time shall be determined approximately, and the county's share thereof shall be set apart and allotted to such county either to be used at the option of the county to retire any county bonds issued to improve its State Aid Roads, or to be expended in the improvement of one or more of its other State Aid Road Routes, with a permanent type of road, under the direction and to the satisfaction of the State Highway Commission:

That the State Highway Commission be authorized, empowered and directed to take whatever steps may be necessary, subject to the approval of the Governor, to construct said roads to be improved:

That in submitting such law to the people, provision shall be made for the publication of said law, for three months, at least, before the vote of the people shall be taken upon the same, and provision shall be made, at the time, for the payment of the principal and also for the payment of the interest annually, as it shall accrue, by a tax levied for the purpose, or from other sources of revenue; which law, providing for the payment of the principal and of such interest by such tax, shall be irrevocable until such debt is paid; and the law levying the tax shall be submitted to the people with the law authorizing the debt to be contracted, on a form of ballot to be provided for in such law; and

BE IT FURTHER RESOLVED, That this Association believes that it is only fair and just that motor vehicles, and especially the heavier machines that are so likely to cut up and injure the highways, should bear a larger share of the cost of building and maintaining a system of road roads, and therefore, recommends that this Association make an effort to get the General Assembly to pass a bill to make reasonable increases in the automobile license fees, the money therefrom to be used entirely for the improvement of the roads of the State, or to aid in the payment of the principal and interest of a State bond issue for road improvement; and

BE IT FURTHER RESOLVED, That this Association ask the General Assembly to appropriate enough money from the general fund to meet the requirements of the Federal Aid Statute for building durable roads and to authorize, empower and direct the State Highway Commission to take such steps as may be necessary to meet the requirements of the Federal Government in the building of durable highways in the State, to be so planned and located as to be of the greatest good to the whole people; and

BE IT FURTHER RESOLVED, That the other questions submitted for the consideration of this Association be referred to a special committee of the Association for careful consideration and to be reported on with the recommendation of the Committee at the next meeting of the Association.

Your Committee on Resolutions unanimously recommends the adoption of the foregoing.

Upon a reading of the Committee's report to the convention the action of the Committee in proposing the adoption of the foregoing resolution was received with great enthusiasm and upon vote being taken the report of the Committee was approved and the foregoing resolution unanimously adopted and will be known as the "Danville Platform."

A plat of the proposed layout of the roads to be improved which had been prepared by the State Highway Department was before the meeting and copies of same are being prepared for distribution.

Among the directors elected for the ensuing year appears the name of F. W. Cushing of Highland Park.
