**FOUND**  
 Found—Door key. Owner can have same by paying for this adv. and calling Press Office. 48

**SQUARE TALKS**

No. 1.  
 What do you think would be the result if the churches of Highland Park were crowded on Sundays, every Sunday? This question was put to residents as to the effect on their business.  
 A well known lawyer: My business would improve as Highland Park would be more prosperous, and there would be but few small suits, which are a loss for everyone, including myself.  
 A Doctor: Well, I don't know, except that I wouldn't probably have as many calls on Sunday morning, the causes would probably disappear. More people though would come here to live and that would benefit me. Would be glad to see it anyhow.  
 A Preacher: He couldn't talk for a few minutes. Then he got started and—it will probably be in a sermon before long.  
 A Merchant: Bring more people here to live. More would pay bills promptly. I own property: It would gain in value, and besides I'd like to see it—and his face smiled as he said the latter.  
 A Laborer: Crowded churches? And everybody could go? (Remark: Everyone can now.) Laborer: Yes, but we would all go if crowds went. (The example of the thing?) Oh, I don't know, but everything would be better, and I guess I'd make more money.  
 A Real Estate Man: If you guarantee that, I'll get my Company to double their interests now. It would be fine. I ought to go to church more too. It helps a man every way.  
 A Mayor: He smiled—a fine smile and a church goer's smile. He said: "I would be more proud than ever of my position, and what a more wonderful place than ever Highland Park would be."  
 A Policeman: Well they'd still need me to catch the outsiders. They're only a few mean ones here anyhow, and they wouldn't live here long after that. Personally? Oh, I know I'd be better off, somehow.  
 A Woman: My husband would go too, and I would be very happy, even happier than I am.  
 Another Woman: Words don't just express my thoughts, only that I know that this wonderful place would be more so. The people do so much good now, and of course would do more. It's magnificent to see a lot of men in church, it would be magnificent in the result. And how we women would work to keep them there. If many husbands would say next Sunday morning, "shall we go to church this morning wife?" many wives would be, oh so happy. Maybe the wars have started men thinking. Oh yes, it would make so much more happiness. Let's go; and try it!

**SITUATION WANTED**  
 Wanted—Position as gardener. A-1 references. James Kelley, Highwood, 47-48 pd

**TO BUILD SHIPS AT COST PRICE**

Bethlehem Steel Will Make Offer to Uncle Sam.

**BIDS ON 16 INCH NAVY SHELLS**

No Chance For Profit in Them Under Present Tests, Grace Says—Possible Explanation of the Prices Made by an English Firm Which Bids Under All American Manufacturers.

Speaking recently before the Terrapin Club of Philadelphia, Eugene G. Grace, President of the Bethlehem Steel Company, said in part:  
 In a peculiar sense Bethlehem Steel serves the American people.  
 For example, though we have been able to obtain in Europe almost any price, we have adhered, in our charges to the United States Government, to the basis of prices established before the war began.  
 We agreed—if the Government would abandon its plans for a Federal plant—to make armor for our Navy at any price the Government itself might consider fair.  
 Our ordnance plants are at the disposal of the nation at a fair operating cost, plus a small margin, thus saving the Government investment and depreciation.  
 One of the special needs of the new navy is sixteen-inch guns—guns sixty feet long and capable of hurling a 2000 pound shell with such power and accuracy as to hit a 50 foot square target fifteen miles away.  
 We have undertaken voluntarily to construct, at a cost of \$4,500,000, a plant fitted to build sixteen-inch guns.  
 Under no conceivable circumstances can orders which we may receive for this plant pay even a fair return on the investment.  
 Considerable comment has been made upon the fact that a British manufacturer recently bid less than American manufacturers for sixteen and fourteen-inch shells for the navy.  
 I am unable to state the basis upon which the English bid was made. It should be remembered, however, that this bid was for a specific shell, samples of which are being sent over for test—a test not yet made.  
 Two years ago we took an order for 2400 fourteen-inch armor-piercing shells at a contract price of \$708,000, to be delivered within a certain time or we had to pay a large penalty.  
 The only specifications for making these shells are that they shall be of a certain size and must pierce armor-plate at a certain velocity on impact. It is impossible to foretell the exact conditions of the tests.  
 We had made large quantities of shells in the past which had been accepted. But in placing this particular order the Department altered the angle at which the tested shells must pierce armor plate. The result, however, has been absolute inability on our part to produce in any quantity, shells which will meet these novel tests. In fact, we know of no process of projectile-making through which it is possible to produce in quantities shells which will conform to the requirements.  
 The result is that up to now on that contract of \$708,000, we have put into actual operating expense \$447,881, and have been penalized for non-delivery \$495,744, a total of \$943,625, with no receipts whatever.  
 Such was the experience in the light of which we were called upon recently to bid for sixteen-inch shells.  
 We bid on these shells at approximately the same rate per pound as that of a fourteen-inch shell contract of one year ago upon which the Government awarded contracts.  
 We have not the slightest idea what profit there will be in the making of these shells. We do not know that there will be any. There is no certainty that it would be possible for us to deliver a shell to meet the test.  
 For officers in the Navy to assume that any bid made under such conditions is "exorbitant" is utterly unfair.  
 We bid on the new battle-cruisers which Navy department experts, after examination of our books, found would yield a profit of less than ten per cent. We agreed to assume risks for increased costs of materials and labor, that made it possible that these contracts might yield no profit whatever.  
 The costs run beyond the amount appropriated by Congress on the basis of the cost estimates made a year ago.  
 And because shipbuilders could not alter the inexorable cost facts and reduce bids to early estimates of the Navy Department, the prices are called "exorbitant."  
 It would be a real advantage to be relieved of this naval construction. The profit from it cannot possibly amount to much, and the responsibility is enormous.  
 We have determined to make this offer to the American Government.  
 "If you will build two of the battle-cruisers in Government navy yards we will build the other two at the ascertained cost of building the ships in the Government yards, without additional expense or commissions of any kind. We will also contract to have our ships ready for service ahead of the Government ships."

You can eliminate that unsightly fire place and do away with the dust and smoke

**North Shore Gas Co.**

**You Can Depend On the Electric**

DEPENDABLE schedules are an important feature of the improved service on this new North Shore Electric line. Have you the latest descriptive folder and time card? You really ought to have one. Become familiar with the running time and the limited and local stops.  
 North Shore Electric trains will bring you anywhere you wish to go, north or south of Highland Park—north as far as Milwaukee and south as far as Chicago.

In Milwaukee, North Shore Electric trains run direct to the heart of things at 2nd and Grand Ave. In Chicago, the Elevated (which meets North Shore trains at Central Street, Evanston) brings you to any part of the city.

30 limited trains a day—numerous locals
