You have often heard that the Buick is the most powerful motor. The Buick Valve-in-Head arrangement is the reason for that great power. If you are interested, call us up and ask for a demonstration. We just received five car loads of Buicks and immediate delivery can be had, on any model you choose from this lot. Now is the time to place your order. When better cars are built Buick will build them.

SQUARE TALKS

Lives of great men all remind us. What a lot we owe our wives. Little women get behind us. And make us, make something of our lives.—Selected.

So it is advisable that you get a little woman behind you as soon as possible, and then listen to her, heed her, ask her. If you had one and had asked her advice recently, she would, no doubt, have suggested that you vote for the East Side Park Board to have included the West Side too, as that was a good plan.

Go to Bahr's to see a wonderful little model of the new proposed entrance to Ravinia.

Applaud and support Pay-up-Week. Listen to and do many other things worth while—and—

Go to church Sunday and take her with you. Think it over.

There are about 10,080 minutes in every week. Sixty of them spent in church would still leave over 10,000 of them for sleeping, eating, games, money making and any other thing. None of which are as important.

What excuse do you use for not going to Church? Work so hard week days, need the air and exercise all day Sunday, or—your clothes—home duties, need rest in bed? Would you use any of them if you faced the Almighty in person? And are you fooling yourself? You don't go to church very often, because—give the reason! Can you square that reason with your Creator and your conscience? One cannot fool God—one cannot! One starts trying to though, by fooling themselves.

Do you suppose that there would be a vacant seat in any Church, anywhere, if people thought that the end of things would be next month? Wouldn't you be one of the crowd? The one who knows this best, is God.

Mr. Business Man: Try to give your customer the same kind of a bargain you want God to agree to—and you would lose him, wouldn't you? There isn't any law that forces one to attend church, even only 100 minutes in a whole week—but men think and wake up sometimes. Why not now?

More Daylight—Better Ventilation No Awnings Perfection Shade Adjuster

A Shade that will allow light and ventilation at the top and bottom of a window covers the ideal situation with reference to shading window and ventilating a room.

An equipment that will permit the proper light in a room is a valuable asset, not only in saving the expense of artificial light, but in saving the eyes; and expense is seldom spared in seeking the best in ventilation. These features mean health economy, and in a factory or office greater efficiency.

The Perfection Shade Adjuster is just what its name implies. It can be lowered from the top, and raised from the bottom, to any desired adjustment, and with perfect ease. You can regulate the light, and shade just such portions of the room as desired. See the working model in our store.

The above illustration shows a Box Window and The Perfection Shade Adjuster running against the stop holding in the sash.
